1. Your role at a glance

You run fieldwork day to day: keep the sample moving through verification, make sure every case has a Contact RA and contact details, keep follow-ups and appointments on schedule, make replacement and withdrawal decisions with the PI, and oversee QA, KII and documentary work.

You can

- Open 18 screens — everything except the Audit Log.
- Register organisations, pair Reserves, assign Contact RAs and verify cases in bulk.
- Record respondents, invite, log contacts, send follow-ups, manage appointments.
- Record withdrawals and activate Reserves.
- Take QA decisions and work QA exceptions; manage KII and document records; log costs.
- Download the de-identified analysis export.

You cannot

- Open the Audit Log.
- Download the full operational export or the KoboToolbox data workbooks (PI only).
- Create staff accounts (ask the PI).

Where this fits

The System Manual explains how the whole system works. This guide covers only what you do. Ask the Field Coordinator or PI when something is outside your role.

2. Signing in and your screens

Signing in

1. Open <https://research.agribizframework.com/admin/login> in any modern browser (Chrome, Edge, Firefox or Safari), on a computer, tablet or phone.
2. Type your **Username** and **Password**, then select **Sign in**.

The screenshot shows a web browser window with a dark blue header bar at the top. The header contains the text 'CHINHOMY UNIVERSITY OF TECHNOLOGY' and 'ABF-FST Research Operations Centre' in white. Below the header is a light gray background. In the center, there is a white rectangular box containing the 'Internal sign in' form. The form has two input fields: 'Username' with the text 'pi.admin' and 'Password' which is empty. Below the password field is a dark blue button with the text 'Sign in' in white.

Figure 1. The sign-in screen for all internal staff.

3. You arrive on your start screen: **Executive Dashboard**. The bar across the top lists only the screens your role (Field / Digital Coordinator) can open.

Accounts

There is no self-registration. The PI / System Admin creates every account and sets its role. Ask the PI if you need an account, a different role, or a password reset.

Finding your way around

- The **top bar** shows your username and role, and the screens you can use. It is not a full menu with some items greyed out: anything absent is simply not part of your role.
- Most screens have a **← Back to ...** link at the top that returns you to the screen you came from.
- Registers show **20 rows per page**. Use **Previous** and **Next** at the foot of the list, and the **Search** box above it.
- **Change password** (top right) lets you set a new password at any time. Choose a long password you do not use anywhere else.
- **Sign out** (top right) ends your session. Always sign out on a shared or public computer.
- If you are inactive for a while you may be asked to sign in again. This protects research data on unattended devices.

Figure 2. Opening a screen outside your role (for example from an old bookmark) shows this card instead of the screen.

Your screens

Screen	What you use it for
Dashboards and Reports	Track progress, coverage and bottlenecks.
Main-400 Register	Cases, bulk verification.
Organisations	Late additions and replacements.
Appointments, Follow-ups	Keep contact on schedule.
Form PDFs	Completed forms for all three forms.
QA Queue, QA Exceptions	Support and cover the QA RA.
KII Register, Documents	Oversee the other strands.
Reserve Activation	Replace dropped cases.
Cost	Log and monitor spend.
Export	De-identified analysis export.

Changing your password

1. Select **Change password** in the top right corner.
2. Enter your **Current password**, then the **New password** twice, and select **Change password**.

The screenshot shows the 'Change Password' screen. The top navigation bar includes 'Change password' and 'Sign out'. The main content area has a 'Back to Dashboard' link and the title 'Change Password'. Below the title is a form with three input fields: 'Current password', 'New password', and 'Confirm new password'. A 'Change password' button is at the bottom of the form.

Figure 3. Change Password screen.

3. Use the new password next time you sign in. If you have forgotten your password, ask the PI to reset it.

3. Your routine

A suggested rhythm. Adjust it to the Field Coordinator's plan.

When	What to do
Morning	Follow-ups due (make sure RAs send them); Appointments for today; QA Exceptions still open.
During the day	Unblock cases with no phone number; answer RA questions; handle refusals and withdrawals.
End of day	Reports (last 7 days): submissions, response rate, coverage; note strata falling behind.
Weekly	Cases stuck at S05–S07 beyond Day 7; Reserve activations; cost entries; brief the PI.

4. Step-by-step tasks

4.1 Reading the dashboards

Dashboards are for monitoring; nothing on them changes data. Figures refresh whenever the screen is opened.

Figure 4. Executive Dashboard: completions against the 400 / 60 / 50–75 targets, days to data lock, spend, and the lowest-filled strata.

Dashboard	What it tells you	Use it to
Executive	QUAN completed out of 400, KII completed out of 60, documents coded against 50–75, days to the 30 November 2026 data lock, spend to date, lowest-filled strata.	See overall progress and where fieldwork attention is most needed.
Sampling	Main cases by province, verified/total by stratum, Reserve activations by reason.	Check the design stays balanced across strata.
Contact	Organisations verified, eligible respondents identified, invitations sent and opened, upcoming appointments, refusals, unreachable cases.	Track outreach and spot stalled contact.
QA Dashboard	Submissions today and in total, the open QA queue, decisions recorded, completions by administration mode.	Keep the QA backlog under control.
KII/Doc Dashboard	KII completed against 60; KIIs by status; documents by type and QA status.	Track the qualitative and documentary strands.

Targets versus records

The registers hold more records than the targets (for example 90 KII records for 60 completed interviews). The surplus is reserve depth for non-response, not extra work.

4.2 Using Reports (analytics and charts)

1. Select **Reports** in the top bar.

Figure 5. Reports: headline figures for the chosen period.

2. Choose the period with **Last 7 days**, **Last 30 days**, **Last 90 days** or **All time**. Case progress (the funnel and workflow) is always cumulative; time-based figures such as submissions per day follow the period.
3. Read the headline cards: questionnaires submitted, passed QA, response rate (submitted ÷ invited), median completion time, follow-ups sent, withdrawals, Reserves activated, and fieldwork cost per QA-passed case.

Figure 6. Case funnel: each case counted once at every stage it has reached.

4. Select **Show table** on any chart to see the exact numbers, for example to copy them into a progress report.

Figure 7. The same chart as a table.

5. Use **Coverage** to see, by province, organisation type and size, what share of cases have been invited and have submitted. Short bars show where contact effort should go next.

Figure 8. Coverage by group.

6. Check **How questionnaires were completed**. If one administration mode dominates (more than 70% once at least 10 questionnaires are in), the chart shows an imbalance alert so the team can review the mix.

Figure 9. Administration modes.

- Review **Time to complete the questionnaire** and **QA outcomes**. Very short or very long completions are what the QA duration rules flag.

Figure 10. Completion-time distribution.

Reports show counts and rates only — never names or answers — so they are safe to discuss with supervisors.

4.3 Moving cases through verification (bulk)

Every Main case must reach **S03 Eligible respondent identified** before it is invited, otherwise its status will not follow the respondent and no reminders are offered. Verification (S00 → S01 → S02 → S03) can be done for all cases at a step at once.

- Open **Main-400 Register**.
- In **Move cases through verification**, choose the step, for example **S00 Selected → S01 Verification required**. The button shows how many Main cases are at that step, e.g. **Move all 48**.

Figure 11. The bulk verification tool on the register.

3. Select the button and confirm. Each case is moved individually and each move is written to the audit log under your name.
4. Repeat for **S01 → S02** and **S02 → S03**.

Only verification is bulk

Statuses from S04 onwards follow real events (invitation sent, link opened, questionnaire submitted, QA decision) or an individual decision on the case page. They are never changed in bulk.

4.4 Reassigning cases between Contact RAs

Use **Reassign cases** on the Main-400 Register to hand many cases to a Contact RA at once — for example when new RAs start, or when an RA leaves. For a single case, use **Assigned Contact RA** on the case page.

1. Open **Main-400 Register** and find **Reassign cases** (below the verification tool).
2. Choose **From** (Anyone, Unassigned, or a Contact RA), a **Province** or All provinces, and **To** (the Contact RA receiving the cases, or Nobody to unassign).

Figure 12. Reassign cases: the button shows how many cases will move.

3. To split a large province, type a number in **How many**. Cases move in Sample ID order, so move part of the province to one RA, then the rest to the next.
4. Select **Move N cases** and confirm. The move is written to the audit log with every Sample ID.

What the RA sees

A Contact RA sees only the cases assigned to them, including on Follow-ups. Reassigning a case moves its reminders with it.

4.5 Pairing a Main case with its Reserve, and assigning a Contact RA

1. Open the Main case (**Main-400 Register → View**).
2. In **Assigned Contact RA**, choose the RA from the list. The change saves straight away and shows **Currently: <name>**. That RA now sees the case; other Contact RAs do not.

Figure 13. Assigned Contact RA.

3. In **Matched Reserve case**, choose the Reserve. Only locked Reserves not already paired are offered, same-stratum ones first. A cross-stratum choice is allowed but flagged in the audit log.

Figure 14. Matched Reserve case.

4.6 Recording the respondent and their contact details

Invitations and reminders need a phone or WhatsApp number. Record the eligible person as soon as they are identified.

1. Open the case (**Main-400 Register → View**) and find **Respondents and contact details**.
2. Select **Add a person**. Enter **Full name**, **Phone**, **WhatsApp number**, **Email**, and a **Gatekeeper name** and **Gatekeeper contact** if you reach the person through a PA or receptionist.

Figure 15. Adding a person to a case.

3. Choose their **role** and the eligibility decision: **Eligible (I screened them)**, **Not eligible**, or **Not yet screened**.
4. Select **Save person**. To correct details later, select **Edit** beside the person, change the fields, then **Save changes**.
5. Write WhatsApp numbers in international form, e.g. **+263 77 123 4567**, so the WhatsApp buttons open the right chat.

Who is eligible?

Owner or founder, CEO or managing director, finance/credit/risk, operations, strategy/business development, supply chain/commercial, or another senior manager who can answer for the organisation. Anyone else should nominate the right person.

4.7 Sending an invitation

1. Open the case. Check the status is **S03** and a respondent with a number is recorded.
2. In **Invitations**, leave **Channel** as **WHATSAPP** (or choose EMAIL, SMS, PRINTED_CODE or QR to record how it was delivered) and **Wave** as **1**. Select **Send invitation**.

Wave	Channel	Status	Issued	Actions
1	WHATSAPP	SENT	9/15/2026	Revoke

Figure 16. Invitations panel before sending, with the history of earlier invitations.

- The personal link and 8-character manual code appear **once**, with the invitation already written for each channel. Choose **WhatsApp message**, **SMS message** or **Email message** to see exactly what will be sent: the personal link, its expiry date, the manual code and the study contact line.

Figure 17. The link, manual code and ready-written messages are shown once, with a send button for each channel.

- Send it on the channel that suits the respondent:
 - Send via WhatsApp** opens that respondent's chat (their WhatsApp number, or phone number if none) with the message ready. Check you are on the study WhatsApp number, then press Send.
 - Send by SMS** opens the phone's messages app addressed to the respondent, with the shorter SMS message. Use it on a phone.
 - Email from study address** sends the email from abfst.research.cut@gmail.com to the respondent's email on file; replies go to the study inbox. The email is recorded in the audit log.
 - Open in email app** opens the same email in your own mail program, if you need to add something first.
 - Copy message** copies the message shown, for any other channel.
- If a button says no number or email is on file, add it under **Respondents and contact details**, then send a new invitation.
- The case moves to **S05 Invitation sent** automatically. Log the attempt in **Contact timeline** (see Logging a contact attempt).

The link is shown only once

The portal stores only a scrambled fingerprint of the link, so nobody can display it again. If you close the page before sending, select **Send new invitation (replaces current)**: this issues a fresh link and the old one stops working immediately.

Links are valid for **14 days**. Each link belongs to one organisation; never forward one respondent's link to another organisation.

Revoking an invitation

In the invitation history, select **Revoke** on an open invitation (for example, if it was sent to the wrong number). The link stops working at once. Issue a new one if the case should still be invited.

4.8 Sending follow-up reminders

Approved reminders fall due on **Day 2** and **Day 7** after an invitation for respondents who have not yet submitted. Until automatic WhatsApp sending is connected, a person sends each one.

1. Select **Follow-ups**. Each card shows the case, organisation, which reminder is due, when the invitation went out, the respondent and their number, and the exact approved message.

Highveld Meadow Agro-Dealers

Day 2 reminder - invited 9/11/2026 · Farai Demo-Zvobgo · +263 77 000 1022

Hello, this is a reminder about the ABF-FST research study invitation sent to your organisation. Please use the link you were sent to take part, or reply here if you have questions.

Figure 18. Follow-ups due. Contact RAs see only their own cases.

2. Select **Open in WhatsApp**. WhatsApp opens with the message ready for that number; send it. If the card says **no number on file**, the button reads **Open WhatsApp (choose contact)** — pick the chat yourself, and add the number to the case afterwards.
3. Come back and select **Mark as sent**. The card disappears and the reminder is recorded under your name.

Mark as sent only after sending

A case can become **S13 Nonresponse** (and be replaced by its Reserve) only after every reminder has been recorded as sent. Marking a reminder you did not send could lead to an organisation being replaced without being contacted.

4.9 Managing appointments

1. Select **Appointments**. Each row shows the case (Sample ID and organisation) or KII, the requested time, the mode (PHONE, WHATSAPP_VOICE, ZOOM, ...) and the status.

Case / informant	Scheduled for	Mode	Status	Actions
SID-2026-000045 Highveld Meadow Agro-Dealers	9/13/2026, 7:15:00 PM	PHONE	COMPLETED	No further action
SID-2026-000051 Baobab Ridge Poultry Farmers Association	9/14/2026, 7:15:00 PM	FACE_TO_FACE	MISSED	No further action
SID-2026-000025 Granite Kopje Agro-Dealers	9/16/2026, 9:15:00 PM	PHONE	REQUESTED	CONFIRMED CANCELLED
SID-2026-000029 Red Earth Dairy Processors	9/18/2026, 12:15:00 AM	WHATSAPP_VOICE	CONFIRMED	COMPLETED MISSED CANCELLED
SID-2026-000087 Silver Stream Fresh Produce Market	9/18/2026, 10:00:00 AM	PHONE	REQUESTED	CONFIRMED CANCELLED
SID-2026-000041 Acacia Downs Growers Cooperative	9/18/2026, 7:15:00 PM	ZOOM	REQUESTED	CONFIRMED CANCELLED

Figure 19. Appointment Queue.

2. Use **Filter by status** to show, for example, only **REQUESTED** appointments.
3. Contact the respondent to confirm, then select **CONFIRMED**.
4. After the session select **COMPLETED**, or **MISSED** if they did not attend, or **CANCELLED**. Only valid next steps are shown; a finished appointment shows **No further action**.

4.10 Logging a contact attempt

Record **every** attempt, successful or not. The Contact Dashboard, Reports and any later replacement decision rely on it.

1. On the case page, scroll to **Contact timeline** → **Log a contact attempt**.

Figure 20. Contact timeline and the form for logging an attempt.

2. Choose the **channel** (WHATSAPP, EMAIL, PHONE, SMS, FACE_TO_FACE) and the **outcome** (REACHED, NO_ANSWER, WRONG_NUMBER, REFUSED, RESCHEDULED, COMPLETED).
3. Add a short, factual note (optional), e.g. "PA says MD travelling; call back Thursday". Do not record opinions about the person.
4. Select **Log contact attempt**. The entry appears at the top of the timeline with the date and time.

4.11 Changing a case's status by hand

Most statuses move automatically. Use **Advance workflow status** on the case page only for decisions a person makes, such as recording that an organisation is ineligible or has refused.

1. On the case page, find **Advance workflow status**. Only the transitions allowed from the current status are shown, e.g. → S04 or → S14.

Advance workflow status

→ S06 → S12 → S13

Figure 21. Only valid next statuses are offered.

2. Log a contact attempt or note explaining the decision first.
3. Select the new status. The change is audited.

From	Can move to
S00	S01
S01	S02, S15
S02	S03, S14, S15
S03	S04, S14
S04	S05
S05, S06, S07	Next step, S12 Refused, S13 Nonresponse
S08	S09, S10
S09	S10
S10	S11
S12–S15	S16 Reserve eligible for activation

4.12 When the person is not the right respondent

- If someone chooses **None of these describe me**, the portal thanks them and the questionnaire never opens. No answers are recorded.
- Ask them politely to nominate the right senior person, record that person under **Respondents and contact details**, and send a new invitation.
- If nobody suitable exists, record the reason in the contact timeline and move the case to **S14 Ineligible** (Field Coordinator or PI).

4.13 Recording a withdrawal

A participant may withdraw at any time, for any reason, without giving one.

1. Stop contacting the person immediately.
2. On the case page, in **Record a withdrawal**, choose **How they told us — By phone or in person, or In writing (WhatsApp, email, letter)** — and type the reason or their own words.

Figure 22. Record a withdrawal.

3. Select **Record withdrawal** and confirm.

In one step the portal records the withdrawal, stops the invitation link and all reminders, moves the case to **S12 Refused** where allowed, erases the phone, WhatsApp, email and gatekeeper contact, and flags the case as `consent_withdrawn` in every export. This cannot be undone.

Answers already submitted

PI decision (15 September 2026): a questionnaire submitted before the withdrawal is **kept for the audit trail but never analysed**. It is left out of the de-identified analysis export automatically, flagged `consent_withdrawn` in the operational export, and marked in the PI's KoboToolbox workbook (README count and `portal_consent_withdrawn = TRUE`) and PDF ZIP (file name starts WITHDRAWN-).

4.14 Activating a Reserve case

A Reserve replaces its Main case only after the Main case reaches a drop state (S12 Refused, S13 Nonresponse, S14 Ineligible or S15 Duplicate/inactive) and there is evidence.

1. Select **Reserve Activation**. Every locked Reserve is listed with a search box.

Figure 23. Reserve Activation.

2. Find the Reserve matched to the dropped Main case (the Main case page shows the pairing).
3. Choose the authorised reason: **Ineligible, Inactive, Duplicate, Refusal** or **Nonresponse exhausted**. There is deliberately no "other".
4. Write the **Evidence note (required)**, e.g. "MD declined by phone 12 Sep, logged in contact timeline".
5. Select **Activate this reserve**. The Reserve becomes invitable and is worked like any Main case, starting with verification.

4.15 Registering a new organisation and its sample case

The approved registers are already loaded. Use this only for a late addition, replacement or correction.

1. Select **Organisations** in the top bar.

The screenshot shows the 'Register Organisation' form in the ABF-FST Research Operations Centre. The form is titled 'New organisation' and includes a note: 'Master_ID is generated automatically from the province once saved.' The form fields are: Name (text input), District (text input), Province (dropdown menu with 'HARARE' selected), Entity type (dropdown menu with 'e.g. Small/Medium Enterprise (SME)' selected), Actor family (dropdown menu with 'AGGREGATION_MARKET_RETAIL' selected), Value chain (dropdown menu with 'e.g. Horticulture' selected), and Size class (dropdown menu with 'MICRO' selected). A 'Register organisation' button is at the bottom of the form. Below the form is a table titled 'Registered organisations' with a search bar 'Search name, Master ID or dis'. The table has columns: Master ID, Name, Province, and Verification. The first row shows: MID-HV-000009, Acacia Downs Dairy Processors, MASVINGO, UNVERIFIED. A link 'Create sample case' is next to the 'UNVERIFIED' status.

Master ID	Name	Province	Verification
MID-HV-000009	Acacia Downs Dairy Processors	MASVINGO	UNVERIFIED

Figure 24. Register Organisation: the form (top) and the list of registered organisations (below).

2. Complete **Name**, **District**, **Province**, **Entity type**, **Actor family**, **Value chain** and **Size class**. Province, actor family and size class decide the stratum, so check them carefully.
3. Select **Register organisation**. The Master ID (e.g. MID-HA-000012) is generated automatically.
4. When offered, choose **Main** or **Reserve** and select **Create sample case**. The Sample ID is generated and the new case page opens. You can also create the case later from the organisation's row in the list.
5. For a Main case, register its Reserve counterpart in the **same province, actor family and size class**, then pair them (next procedure).

4.16 Building a pre-interview profile (PROIT)

PROIT lets the respondent confirm facts already on public record instead of answering them from scratch. It never pre-fills, skips or infers any scale item (ABI, NFM, Digital Readiness, FST) — only descriptive background.

1. On the case page (or KII page), in **Pre-Interview Profile (PROIT)**, select **Start background research**.
2. Under **Add a background field**, choose a field in **Select a field...**, type **What was found (documentary value)**, and select **Add field**.

Figure 25. A draft profile: each fact needs at least one source.

- For each field, type the **Source title** (e.g. companies registry entry), choose the confidence (HIGH, MODERATE, LOW) and the authority tier — Tier 1 statutory register or audited report, Tier 2 official website or association record, Tier 3 reputable media or professional profile, Tier 4 corroborated public platform content — then select **Add source**.
- Use **Researcher review screen** to check the whole profile, including gaps and contradictions.
- A second researcher reviews it and selects **Lock pre-profile**. Only a locked profile is shown to the respondent, who confirms, corrects, or says they don't know, prefer not to say, or it is not applicable. The documentary value, the respondent's answer and the reconciled value are kept separately.

4.17 Reviewing questionnaires in the QA Queue

- Select **QA Queue**. Each submission shows the Sample ID, when it was submitted, the administration mode, the completion time in minutes and its QA status (PENDING or QUERY).

Figure 26. QUAN QA Queue with the KoboToolbox sync panel.

- Open the completed form to check the answers: **Form PDFs** → **Download PDF**, or the **Completed questionnaire** panel on the case page.
- Check it against the QA rules (table below) and any open QA exception for that case.

4. Write a **Note (required)** explaining your decision.
5. Select **Accept** (moves the case to S10 QA passed), **Re-query** (S09 QA query — follow up with the respondent or the RA who administered it) or **Reject** (not usable).

Rule	Setting	Effect
Required answers missing	65 required fields from the live questionnaire	Hard stop: raises an exception; cannot pass without a human decision and note.
Too quick	Completed in under 5 minutes (300 s)	Soft flag for review.
Too slow	Completed in over 90 minutes (5400 s)	Soft flag for review.
Possible duplicate	Another submission for the same organisation within 24 hours	Soft flag for review.

Nothing passes automatically

Even a submission with no flags needs a person to select Accept. Every decision and its note is audited.

Pulling new submissions now

Submissions arrive within seconds (KoboToolbox notifies the portal) and a full check runs every 15 minutes between 06:00 and 22:00 and hourly overnight. To check immediately, select **Sync now** in **KoboToolbox sync**; the panel shows the last run, how many were pulled and how many were new or updated. An edited submission returns to the queue for review.

4.18 Working QA exceptions

1. Select **QA Exceptions**. Each card shows the rule that fired (for example `hard_stop_missing_required_fields` or `min_plausible_duration_seconds`), the Sample ID, when it was raised and its status. Oldest first.

Figure 27. QA Exception Queue.

2. Tick **Only mine** to see exceptions assigned to you; tick **Show closed** to include resolved ones.
3. Use **Assign to** to take ownership (or give it to a colleague). The status becomes **In progress**.
4. Investigate: open the form PDF, check the case timeline, contact the respondent if needed.
5. Type **What was done about it?** and select **Resolved**, or **Not a real problem** if the flag was a false alarm. A note is always required.

4.19 Downloading or emailing completed forms (Form PDFs)

1. Select **Form PDFs**. You see the completed questionnaire, KII Guide and document forms from KoboToolbox, newest first, 20 per page.

Figure 28. Completed form PDFs.

2. At the top, the sync panel shows whether the portal holds the same forms as KoboToolbox: for example “✓ In sync with KoboToolbox — KoboToolbox holds 12 · the portal holds 12”. Each row also says “✓

saved in portal” once the portal has an identical copy. If the panel says “Not in sync”, select **Sync now**; it takes a few seconds.

3. Select **Download PDF** to save a readable copy: sections, questions, the chosen answers as words (not codes) and repeated groups.
4. Select **Email to me** to send the PDF to the email address on your account.
5. For the questionnaire only, select **Email to respondent** to send the respondent a copy of their own answers at the email address recorded on the case (only while their consent stands). You are asked to confirm first. Every email is audited with the address masked.

The same PDF is available from the record itself: the case page (questionnaire), the KII page (KII Guide) or the document page (coding form).

How the sync works

The portal keeps its own copy of the questionnaire, KII Guide and Document Analysis Tool, and refreshes it every 15 minutes and whenever someone selects Sync now. A submission edited in KoboToolbox is updated here; one deleted in KoboToolbox is flagged as removed. You never need to sync before downloading a PDF: the PDF is always read from KoboToolbox at that moment.

4.20 Logging fieldwork costs

1. Select **Cost**. The top shows total spend, cost per QA-passed questionnaire and cost per completed KII, with spend by category.

The screenshot shows the 'Cost Dashboard' of the ABF-FST Research Operations Centre. The dashboard includes three summary cards: 'TOTAL SPEND' at \$1442.50, 'COST PER QA-PASSED QUAN' at \$206.07, and 'COST PER COMPLETED KII' at \$180.31. Below these is a table titled 'Spend by category' with columns for 'Category' and 'Total'. The table lists various categories and their corresponding costs. At the bottom, there is a 'Log a cost event' form with fields for date, category, and amount.

Category	Total
OTHER	\$30
HOSTING	\$40
ACCOMMODATION	\$180
RA_ALLOWANCE	\$900
MESSAGING	\$25
TRANSPORT	\$120
AIRTIME_DATA	\$147.5

Log a cost event

Date: 09/15/2026

Category: TRANSPORT

Amount:

Figure 29. Cost Dashboard and the Log a cost event form.

2. In **Log a cost event**, enter the date, choose the category (RA_ALLOWANCE, AIRTIME_DATA, TRANSPORT, ACCOMMODATION, HOSTING, MESSAGING, OTHER) and the amount in USD.
3. Select **Log cost**. Keep the receipt as the study's finance rules require.

Data Export

De-identified analysis export

CSV with no contact-identifying fields -- safe for analysis and sharing with the wider research team. Available to Analysts, Field Coordinators and the PI/Admin.

[Download analysis export \(CSV\)](#)

Full operational export

Includes contact data (names, phone, email, gatekeeper details). Internal operations use only -- never distributed externally. PI/Admin only.

[Download operational export \(CSV\)](#)

KoboToolbox data — every completed form

Straight from KoboToolbox. The Excel workbook has one row per submission with answers as codes (for SPSS, Stata or R) and as labels, a question dictionary, the choice lists, and a sheet for each repeating group; questionnaire rows also show the matched case, QA state and any withdrawal. The ZIP holds every completed form as a PDF with a manifest. PI only; every download is audited.

Main Study Questionnaire	Excel workbook	All completed forms (PDF ZIP)
Main Study KII Guide	Excel workbook	All completed forms (PDF ZIP)
Document, Digital Platform & Media Analysis Tool	Excel workbook	All completed forms (PDF ZIP)

A large ZIP starts downloading straight away and grows as each form is added.

Research study: This portal supports data collection for a doctoral research study on agribusiness financing readiness. Your participation and responses are used for research purposes only. No score, rating, or

Figure 30. Data Export.

Download	Contains	Who
De-identified analysis export (CSV)	One row per questionnaire: sample_id, master_id, province, actor_family, value_chain, size_class, administration_mode, qa_status, submitted_at, completion_seconds. No names or contact details. Participants who withdrew are left out.	PI, Field Coordinator, Analyst
Full operational export (CSV)	Every questionnaire, including withdrawn ones (consent_withdrawn), plus organisation name, respondent name, phone, email and gatekeeper details. Internal operations only.	PI only
KoboToolbox data: Excel workbook	Every submission's answers for one form: data_codes (codes for SPSS/Stata/R), data_labels, a sheet per repeat group, the questions dictionary, the choices lists, and for the questionnaire the matched case, QA status, withdrawal flag and workflow status.	PI only
KoboToolbox data: All completed forms (PDF ZIP)	Every completed form as a PDF, with manifest.csv listing file, record, KoboToolbox id and submission time.	PI only

5. Rules you must follow

- Record a withdrawal the same day you hear of it.
- Activate a Reserve only with an authorised reason and written evidence.
- Treat everything in the portal as **confidential research data**. Do not screenshot, copy, print or forward names, phone numbers, email addresses or answers except as your role requires.
- Never share your username or password, and never sign in for someone else.
- Use the respondent's contact details **only** to manage their participation in this study (invitations, reminders, appointments).
- Never tell a respondent, lender or anyone else that answers affect financing. The study generates **no score, rating or financing decision**.
- If a respondent asks to withdraw, stop contacting them and tell the Field Coordinator or PI the same day so the withdrawal is recorded.
- Report a lost device, a suspected account compromise, or data sent to the wrong person to the PI immediately.

6. Troubleshooting

Situation	Likely cause	What to do
"Move all" shows 0	No Main cases are at that step.	Choose the next step in the list.
A case gets no reminders	It was invited before reaching S03, or has no invitation.	Verify it to S03 and issue a new invitation.
"This screen isn't part of your role"	The screen belongs to another role (often an old bookmark or shared link).	Select Go to my start screen. If you need that screen, ask the PI about your role.
"Too many sign-in attempts from this network"	Sign-in is rate-limited per network; an office shares one address.	Wait a minute and try again. A wrong password says so explicitly.
A register shows fewer rows than expected	Registers show 20 rows per page; a Contact RA sees only assigned cases.	Use Next, or search. Ask the Field Coordinator to assign the case.
A button is greyed out	A required step is missing (a note, an authenticity decision, a selection).	Read the message beside the button; complete the missing step first.
"KoboToolbox couldn't be reached"	KoboToolbox is slow or the connection token has changed.	Try again in a few minutes. If it persists, tell the PI.
Form PDFs says "Not in sync with KoboToolbox yet"	The counts differ: a form was submitted or changed in KoboToolbox since the last sync (it runs every 15 minutes).	Select Sync now. If it still differs, or says it couldn't reach KoboToolbox, try again in a few minutes and tell the PI if it persists.
A document says "Already submitted" and its answers are locked	Its coding was already sent to KoboToolbox; changing it here would not change that record.	To redo the coding, delete that record in KoboToolbox, then select Sync now on Form PDFs. The document unlocks.
A page keeps loading	A slow or dropped connection.	Refresh the page. Your saved work is not lost; unsaved typing may be.
A file upload seems stuck	A large file on a slow connection takes time; the bar shows how much has been sent.	Wait for Saving... and the file name. If it fails, try again or upload a smaller version.

7. Quick reference

Sign in	https://research.agribizframework.com/admin/login
