

Role Guide 8: Supervisor (read-only)

Step-by-step instructions for the Supervisor (read-only) role in the ABF-FST Digital Respondent Portal.

STUDY	Developing and Validating the Agribusiness Bankability Framework for Food Systems Transformation through Novel Financing Models in Zimbabwe (ABF-FST)
PRINCIPAL RESEARCHER	Happyson Saina, Doctor of Strategic Management candidate, Chinhoyi University of Technology
SUPERVISORS	Dr L. Chikazhe and Dr J. Kanyepe
FOR	Academic supervisors and others overseeing the study
SYSTEM ADDRESS	https://research.agribizframework.com
CONTACT	0773943709 · abffst.research.cut@gmail.com
VERSION	Version 1.2 · 20 September 2026

Screenshots in this document use **fictional demonstration data**. Organisation and person names, phone numbers and figures shown in them are not real study records.

- 7. Quick reference 15

1. Your role at a glance

You oversee the study with read-only access to almost every screen: progress, the sample, contact activity, QA, the KII and documentary strands, and costs. You can open case pages and completed-form PDFs, but you cannot change anything.

You can

- Open 17 screens: all dashboards, Reports, Main-400 Register and case pages, Organisations, Appointments, Follow-ups, Form PDFs, QA Queue, QA Exceptions, KII Register, Documents, Reserve Activation and Cost.
- Download PDFs of completed forms for all three forms.

You cannot

- Change, send, assign, decide or log anything — forms and buttons are replaced by "Your role has read-only access" notes.
- Open the Audit Log or Export.

Where this fits

The System Manual explains how the whole system works. This guide covers only what you do. Ask the Field Coordinator or PI when something is outside your role.

2. Signing in and your screens

Signing in

1. Open <https://research.agribizframework.com/admin/login> in any modern browser (Chrome, Edge, Firefox or Safari), on a computer, tablet or phone.
2. Type your **Username** and **Password**, then select **Sign in**.

The screenshot shows a web browser window with a dark blue header bar at the top. The header contains the text 'CHINHOMY UNIVERSITY OF TECHNOLOGY' and 'ABF-FST Research Operations Centre' in white. Below the header is a light gray background. In the center, there is a white rectangular box containing the 'Internal sign in' form. The form has two input fields: 'Username' with the text 'pi.admin' and 'Password'. Below the password field is a dark blue button with the text 'Sign in' in white.

Figure 1. The sign-in screen for all internal staff.

3. You arrive on your start screen: **Executive Dashboard**. The bar across the top lists only the screens your role (Supervisor (read-only)) can open.

Accounts

There is no self-registration. The PI / System Admin creates every account and sets its role. Ask the PI if you need an account, a different role, or a password reset.

Finding your way around

- The **top bar** shows your username and role, and the screens you can use. It is not a full menu with some items greyed out: anything absent is simply not part of your role.
- Most screens have a **← Back to ...** link at the top that returns you to the screen you came from.
- Registers show **20 rows per page**. Use **Previous** and **Next** at the foot of the list, and the **Search** box above it.
- **Change password** (top right) lets you set a new password at any time. Choose a long password you do not use anywhere else.
- **Sign out** (top right) ends your session. Always sign out on a shared or public computer.
- If you are inactive for a while you may be asked to sign in again. This protects research data on unattended devices.

Figure 2. Opening a screen outside your role (for example from an old bookmark) shows this card instead of the screen.

Your screens

Screen	What you use it for
Dashboards and Reports	Progress, coverage, quality.
Main-400 Register and case pages	How individual cases are being handled.
Appointments, Follow-ups	Whether contact is on schedule.
Form PDFs	Completed questionnaires, KII Guides and document coding forms.
QA Queue, QA Exceptions	Quality decisions and flags.
KII Register, Documents	Qualitative and documentary strands.
Reserve Activation, Cost	Replacements and spend.

Changing your password

1. Select **Change password** in the top right corner.
2. Enter your **Current password**, then the **New password** twice, and select **Change password**.

The screenshot shows the 'Change Password' screen. The top navigation bar includes the user's role 'pladmin - PI / System Admin' and the 'Change password' link. Below the navigation bar is a breadcrumb trail: '← Back to Dashboard'. The main heading is 'Change Password'. The form contains three input fields: 'Current password', 'New password', and 'Confirm new password'. A 'Change password' button is located at the bottom of the form.

Figure 3. Change Password screen.

3. Use the new password next time you sign in. If you have forgotten your password, ask the PI to reset it.

3. Your routine

A suggested rhythm. Adjust it to the Field Coordinator's plan.

When	What to do
Before supervision meetings	Reports (last 30 days): funnel, response rate, coverage, QA outcomes, mode balance.
Spot checks	Open a few case pages and completed-form PDFs; read QA notes and exceptions.
Monthly	Cost per QA-passed case; Reserve activations and their evidence notes.

4. Step-by-step tasks

4.1 Reading the dashboards

Dashboards are for monitoring; nothing on them changes data. Figures refresh whenever the screen is opened.

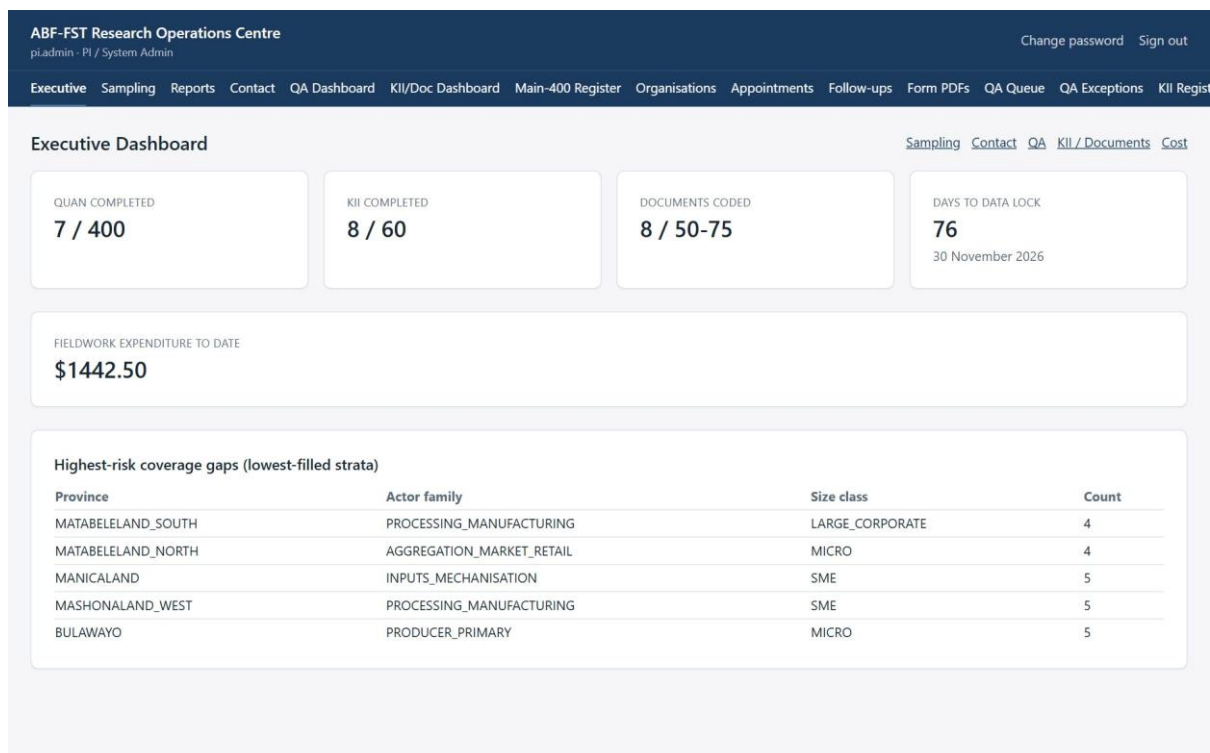

Figure 4. Executive Dashboard: completions against the 400 / 60 / 50–75 targets, days to data lock, spend, and the lowest-filled strata.

Dashboard	What it tells you	Use it to
Executive	QUAN completed out of 400, KII completed out of 60, documents coded against 50–75, days to the 30 November 2026 data lock, spend to date, lowest-filled strata.	See overall progress and where fieldwork attention is most needed.
Sampling	Main cases by province, verified/total by stratum, Reserve activations by reason.	Check the design stays balanced across strata.
Contact	Organisations verified, eligible respondents identified, invitations sent and opened, upcoming appointments, refusals, unreachable cases.	Track outreach and spot stalled contact.
QA Dashboard	Submissions today and in total, the open QA queue, decisions recorded, completions by administration mode.	Keep the QA backlog under control.
KII/Doc Dashboard	KII completed against 60; KIIs by status; documents by type and QA status.	Track the qualitative and documentary strands.

Targets versus records

The registers hold more records than the targets (for example 90 KII records for 60 completed interviews). The surplus is reserve depth for non-response, not extra work.

4.2 Using Reports (analytics and charts)

1. Select **Reports** in the top bar.

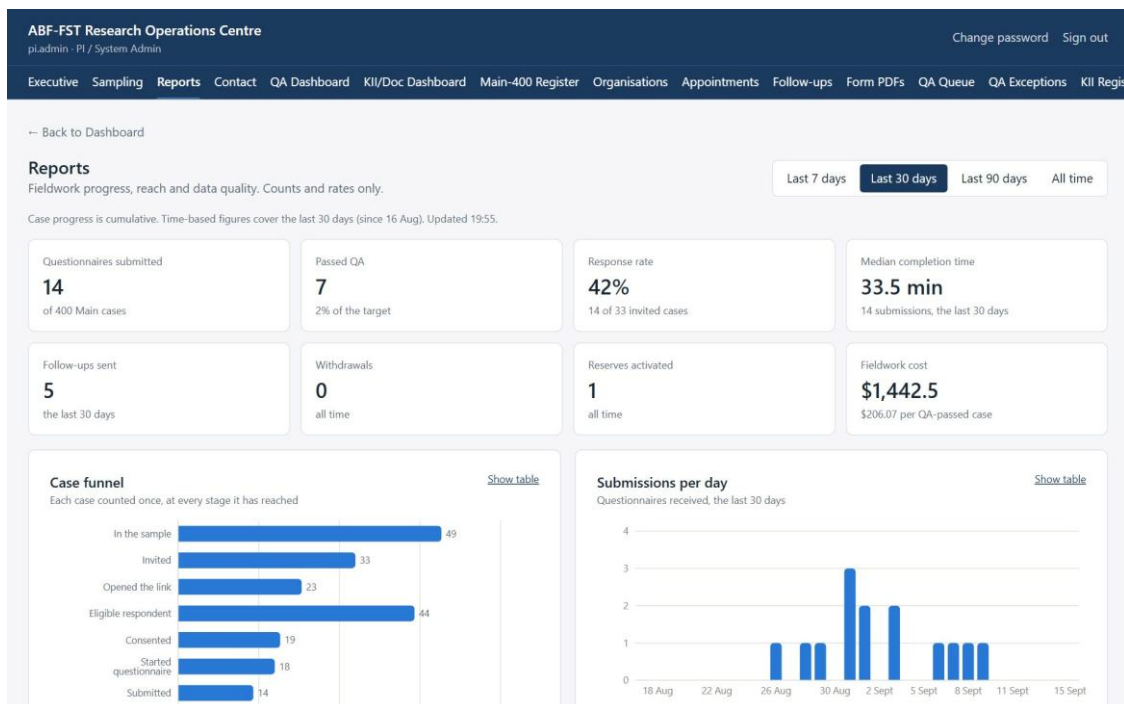

Figure 5. Reports: headline figures for the chosen period.

2. Choose the period with **Last 7 days**, **Last 30 days**, **Last 90 days** or **All time**. Case progress (the funnel and workflow) is always cumulative; time-based figures such as submissions per day follow the period.
3. Read the headline cards: questionnaires submitted, passed QA, response rate (submitted ÷ invited), median completion time, follow-ups sent, withdrawals, Reserves activated, and fieldwork cost per QA-passed case.

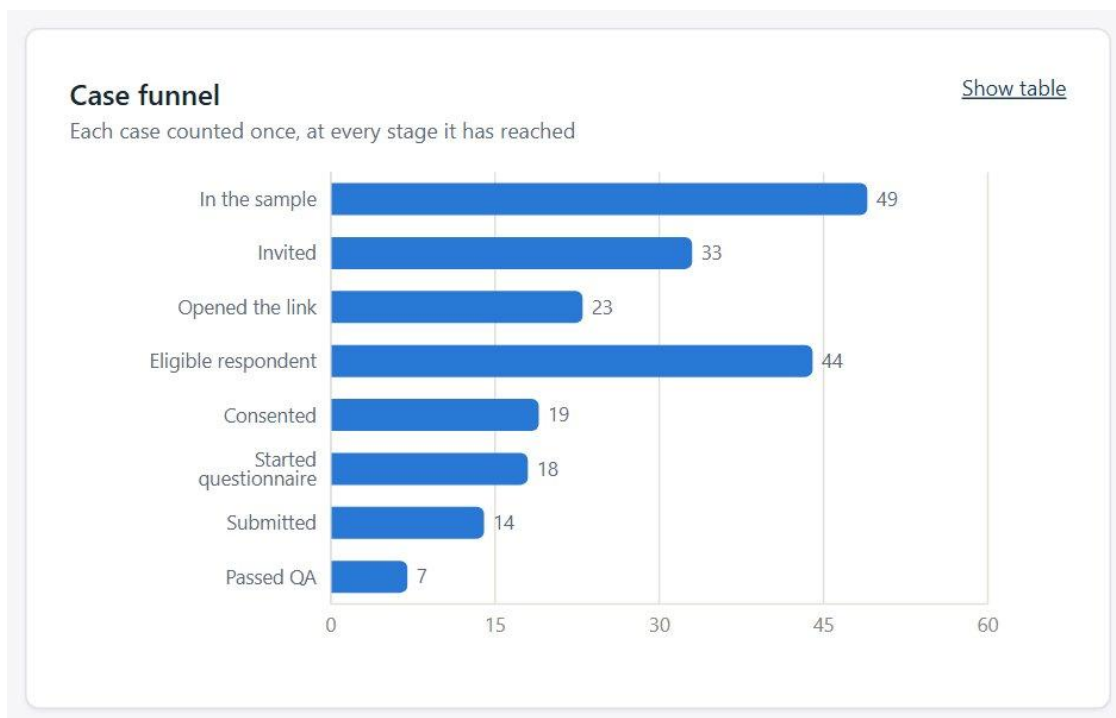

Figure 6. Case funnel: each case counted once at every stage it has reached.

4. Select **Show table** on any chart to see the exact numbers, for example to copy them into a progress report.

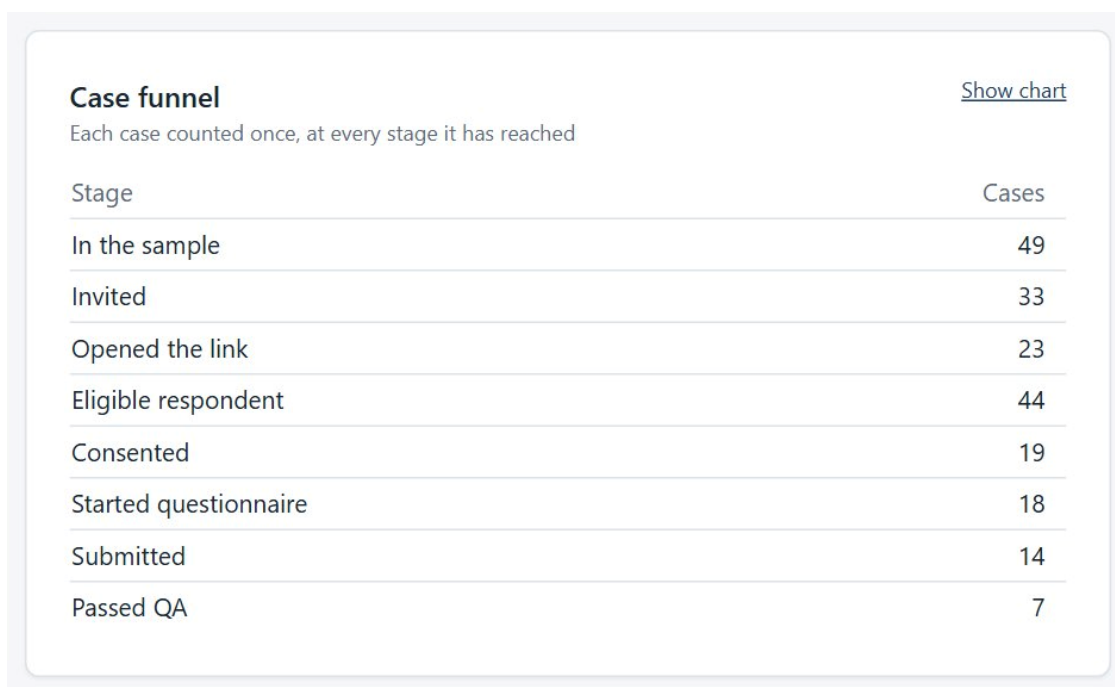

Figure 7. The same chart as a table.

5. Use **Coverage** to see, by province, organisation type and size, what share of cases have been invited and have submitted. Short bars show where contact effort should go next.

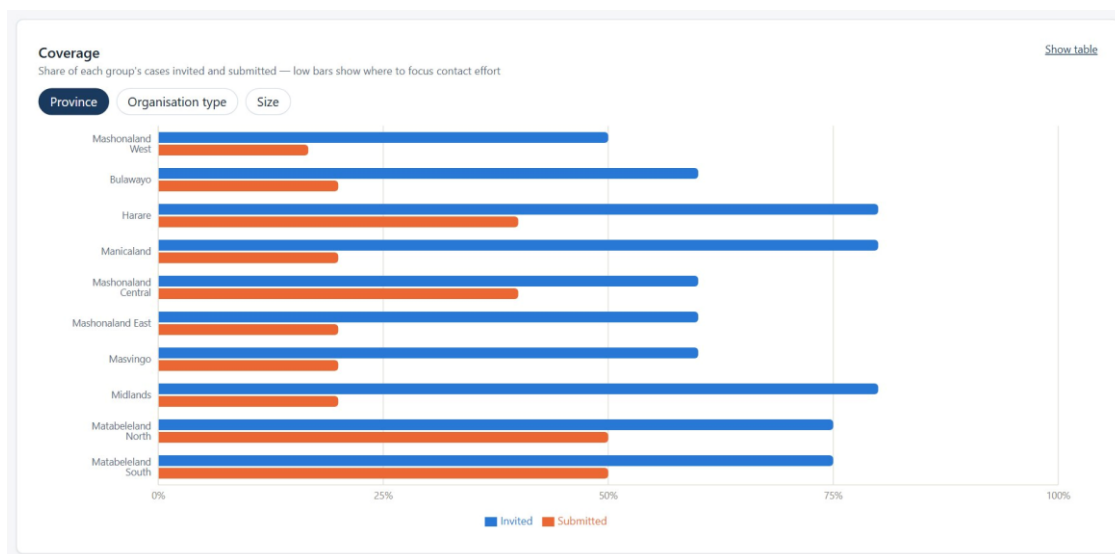

Figure 8. Coverage by group.

6. Check **How questionnaires were completed**. If one administration mode dominates (more than 70% once at least 10 questionnaires are in), the chart shows an imbalance alert so the team can review the mix.

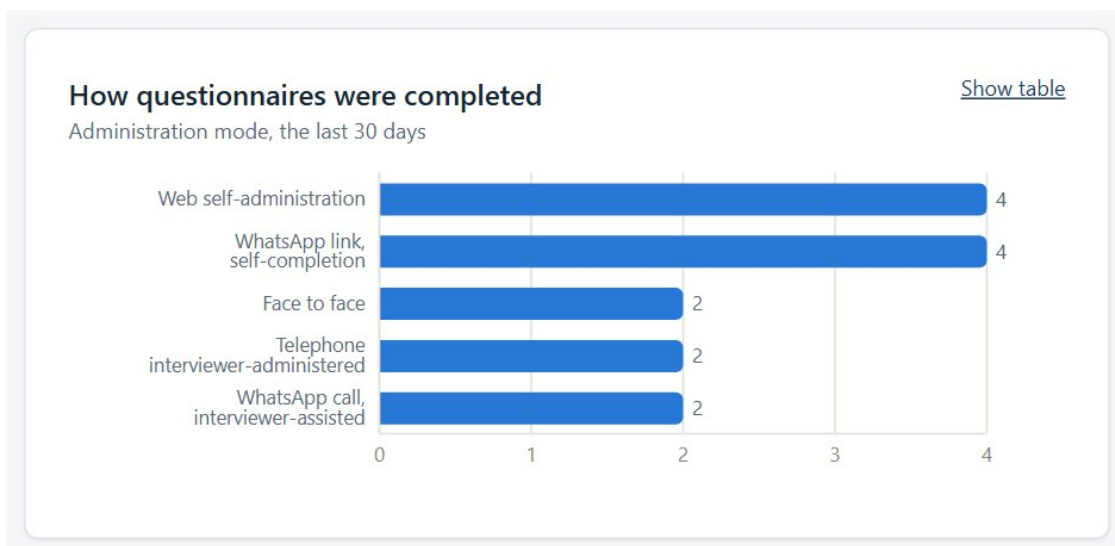

Figure 9. Administration modes.

- Review **Time to complete the questionnaire** and **QA outcomes**. Very short or very long completions are what the QA duration rules flag.

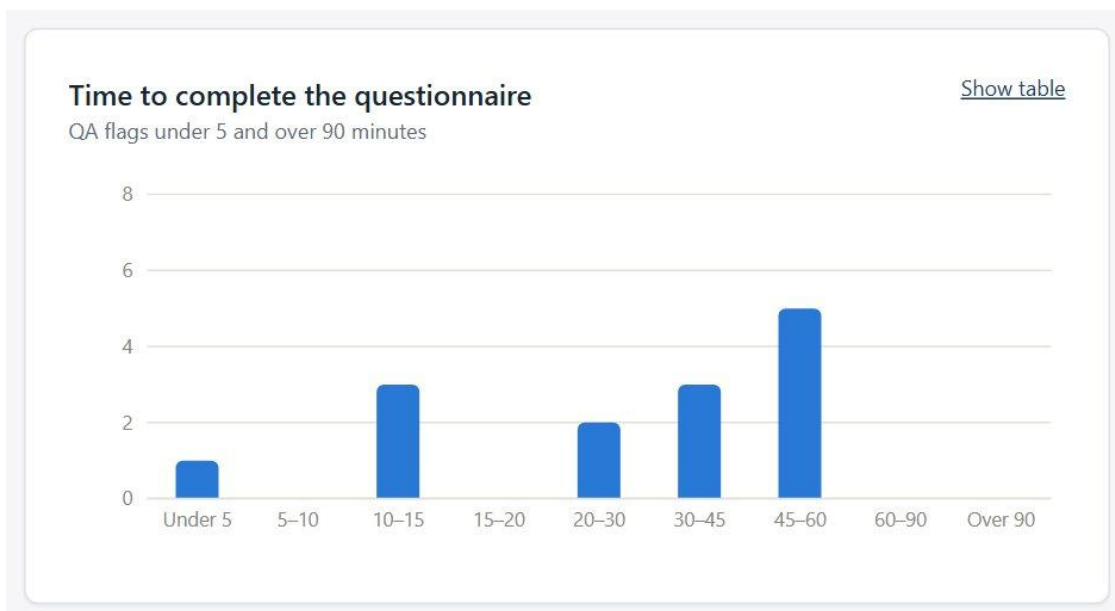

Figure 10. Completion-time distribution.

Reports show counts and rates only — never names or answers — so they are safe to discuss with supervisors.

4.3 Reviewing a case read-only

- Select **Main-400 Register**, search for a case, and select **View**.
- Review the respondent, invitation history, completed questionnaire, status and contact timeline. Controls are replaced by read-only notes.

Submitted 8/31/2026, 8:15:00 PM · Mode 02 · 3 min

Read-only role — QA decisions are recorded by the QUAN QA RA, Field Coordinator or PI.

PENDING

Figure 12. QA Queue in read-only view.

Check that notes explain decisions and that exceptions are closed with reasons.

4.5 Downloading or emailing completed forms (Form PDFs)

1. Select **Form PDFs**. You see the completed questionnaire, KII Guide and document forms from KoboToolbox, newest first, 20 per page.

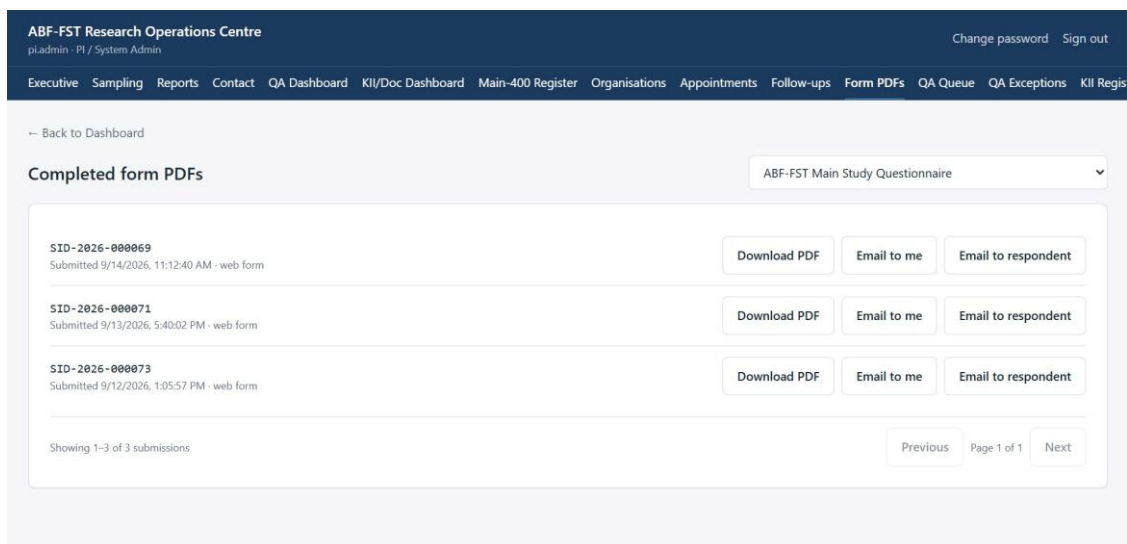

Figure 13. Completed form PDFs.

- At the top, the sync panel shows whether the portal holds the same forms as KoboToolbox: for example “✓ In sync with KoboToolbox — KoboToolbox holds 12 · the portal holds 12”. Each row also says “✓ saved in portal” once the portal has an identical copy. If the panel says “Not in sync”, select **Sync now**; it takes a few seconds.

The same PDF is available from the record itself: the case page (questionnaire), the KII page (KII Guide) or the document page (coding form).

How the sync works

The portal keeps its own copy of the questionnaire, KII Guide and Document Analysis Tool, and refreshes it every 15 minutes and whenever someone selects Sync now. A submission edited in KoboToolbox is updated here; one deleted in KoboToolbox is flagged as removed. You never need to sync before downloading a PDF: the PDF is always read from KoboToolbox at that moment.

5. Rules you must follow

- Raise any concern about how a case, consent or data was handled with the PI directly.
- Treat everything in the portal as **confidential research data**. Do not screenshot, copy, print or forward names, phone numbers, email addresses or answers except as your role requires.
- Never share your username or password, and never sign in for someone else.
- Use the respondent's contact details **only** to manage their participation in this study (invitations, reminders, appointments).
- Never tell a respondent, lender or anyone else that answers affect financing. The study generates **no score, rating or financing decision**.
- If a respondent asks to withdraw, stop contacting them and tell the Field Coordinator or PI the same day so the withdrawal is recorded.
- Report a lost device, a suspected account compromise, or data sent to the wrong person to the PI immediately.

6. Troubleshooting

Situation	Likely cause	What to do
"Your role has read-only access to this screen"	Expected for the Supervisor role.	No action needed.
"This screen isn't part of your role"	The screen belongs to another role (often an old bookmark or shared link).	Select Go to my start screen. If you need that screen, ask the PI about your role.
"Too many sign-in attempts from this network"	Sign-in is rate-limited per network; an office shares one address.	Wait a minute and try again. A wrong password says so explicitly.
A register shows fewer rows than expected	Registers show 20 rows per page; a Contact RA sees only assigned cases.	Use Next, or search. Ask the Field Coordinator to assign the case.
A button is greyed out	A required step is missing (a note, an authenticity decision, a selection).	Read the message beside the button; complete the missing step first.
"KoboToolbox couldn't be reached"	KoboToolbox is slow or the connection token has changed.	Try again in a few minutes. If it persists, tell the PI.
Form PDFs says "Not in sync with KoboToolbox yet"	The counts differ: a form was submitted or changed in KoboToolbox since the last sync (it runs every 15 minutes).	Select Sync now. If it still differs, or says it couldn't reach KoboToolbox, try again in a few minutes and tell the PI if it persists.
A document says "Already submitted" and its answers are locked	Its coding was already sent to KoboToolbox; changing it here would not change that record.	To redo the coding, delete that record in KoboToolbox, then select Sync now on Form PDFs. The document unlocks.
A page keeps loading	A slow or dropped connection.	Refresh the page. Your saved work is not lost; unsaved typing may be.
A file upload seems stuck	A large file on a slow connection takes time; the bar shows how much has been sent.	Wait for Saving... and the file name. If it fails, try again or upload a smaller version.
