

Role Guide 7: Data Analyst

Step-by-step instructions for the Data Analyst role in the ABF-FST Digital Respondent Portal.

STUDY	Developing and Validating the Agribusiness Bankability Framework for Food Systems Transformation through Novel Financing Models in Zimbabwe (ABF-FST)
PRINCIPAL RESEARCHER	Happyson Saina, Doctor of Strategic Management candidate, Chinhoyi University of Technology
SUPERVISORS	Dr L. Chikazhe and Dr J. Kanyepe
FOR	Analysts monitoring progress and working with de-identified data
SYSTEM ADDRESS	https://research.agribizframework.com
CONTACT	0773943709 · abffst.research.cut@gmail.com
VERSION	Version 1.6 · 20 September 2026

Screenshots in this document use **fictional demonstration data**. Organisation and person names, phone numbers and figures shown in them are not real study records.

- 7. Quick reference 15

1. Your role at a glance

You monitor fieldwork through the dashboards and Reports and prepare analysis from the de-identified export. Your role is read-only: you cannot change any record, and you never see names or contact details.

You can

- Open the Executive, Sampling, Contact and KII/Doc dashboards, Reports and Cost (view).
- Download the de-identified analysis export (CSV).

You cannot

- Change any record anywhere.
- See case pages, respondent names, contact details or completed forms.
- Download the operational export or the KoboToolbox data (ask the PI for the de-identified extracts you need).

Where this fits

The System Manual explains how the whole system works. This guide covers only what you do. Ask the Field Coordinator or PI when something is outside your role.

2. Signing in and your screens

Signing in

1. Open <https://research.agribizframework.com/admin/login> in any modern browser (Chrome, Edge, Firefox or Safari), on a computer, tablet or phone.
2. Type your **Username** and **Password**, then select **Sign in**.

The screenshot shows a web browser window with a dark blue header bar at the top. The header contains the text 'CHINGHOY UNIVERSITY OF TECHNOLOGY' and 'ABF-FST Research Operations Centre' in white. Below the header is a light gray background. In the center, there is a white rectangular box containing the 'Internal sign in' form. The form has two input fields: 'Username' with the text 'pi.admin' and 'Password'. Below the password field is a dark blue button with the text 'Sign in' in white.

Figure 1. The sign-in screen for all internal staff.

3. You arrive on your start screen: **Executive Dashboard**. The bar across the top lists only the screens your role (Data Analyst) can open.

Accounts

There is no self-registration. The PI / System Admin creates every account and sets its role. Ask the PI if you need an account, a different role, or a password reset.

Finding your way around

- The **top bar** shows your username and role, and the screens you can use. It is not a full menu with some items greyed out: anything absent is simply not part of your role.
- Most screens have a **← Back to ...** link at the top that returns you to the screen you came from.
- Registers show **20 rows per page** to begin with. At the foot of the list, **Show** lets you choose 10, 20, 50, 100 or 200 rows per page (the portal remembers your choice), and the page numbers, **Previous**, **Next** and the double arrows take you to any page. The **Search** box above the list narrows it.
- **Change password** (top right) lets you set a new password at any time. Choose a long password you do not use anywhere else.
- **Sign out** (top right) ends your session. Always sign out on a shared or public computer.
- If you are inactive for a while you may be asked to sign in again. This protects research data on unattended devices.

Figure 2. Opening a screen outside your role (for example from an old bookmark) shows this card instead of the screen.

Your screens

Screen	What you use it for
Executive, Sampling, Contact, KII/Doc	Progress and coverage.
Reports	Analytics with charts and tables.
Cost	Spend and cost per completed case (view only).
Export	De-identified analysis export.

Changing your password

1. Select **Change password** in the top right corner.
2. Enter your **Current password**, then the **New password** twice, and select **Change password**.

Figure 3. Change Password screen.

3. Use the new password next time you sign in. If you have forgotten your password, ask the PI to reset it.

3. Your routine

A suggested rhythm. Adjust it to the Field Coordinator's plan.

When	What to do
Weekly	Reports for the last 7 and 30 days; coverage by province, organisation type and size; mode balance; completion times.
Monthly	Download the analysis export; update progress tables for the PI and supervisors.
Before data lock	Agree the final export and cleaning plan with the PI.

4. Step-by-step tasks

4.1 Your start screen

Figure 4. Executive Dashboard as seen by the Analyst.

4.2 Reading the dashboards

Dashboards are for monitoring; nothing on them changes data. Figures refresh whenever the screen is opened.

Figure 5. Executive Dashboard: completions against the 400 / 60 / 50–75 targets, days to data lock, spend, and the lowest-filled strata.

Dashboard	What it tells you	Use it to
Executive	QUAN completed out of 400, KII completed out of 60, documents coded against 50–75, days to the 30 November 2026 data lock, spend to date, lowest-filled strata.	See overall progress and where fieldwork attention is most needed.
Sampling	Main cases by province, verified/total by stratum, Reserve activations by reason.	Check the design stays balanced across strata.
Contact	Organisations verified, eligible respondents identified, invitations sent and opened, upcoming appointments, refusals, unreachable cases.	Track outreach and spot stalled contact.
QA Dashboard	Submissions today and in total, the open QA queue, decisions recorded, completions by administration mode.	Keep the QA backlog under control.
KII/Doc Dashboard	KII completed against 60; KIIs by status; documents by type and QA status.	Track the qualitative and documentary strands.

Targets versus records

The registers hold more records than the targets (for example 90 KII records for 60 completed interviews). The surplus is reserve depth for non-response, not extra work.

4.3 Using Reports (analytics and charts)

1. Select **Reports** in the top bar.

Figure 6. Reports: headline figures for the chosen period.

- Choose the period with **Last 7 days**, **Last 30 days**, **Last 90 days** or **All time**. Case progress (the funnel and workflow) is always cumulative; time-based figures such as submissions per day follow the period.
- Read the headline cards: questionnaires submitted, passed QA, response rate (submitted ÷ invited), median completion time, follow-ups sent, withdrawals, Reserves activated, and fieldwork cost per QA-passed case.

Figure 7. Case funnel: each case counted once at every stage it has reached.

- Select **Show table** on any chart to see the exact numbers, for example to copy them into a progress report.

Figure 8. The same chart as a table.

5. Use **Coverage** to see, by province, organisation type and size, what share of cases have been invited and have submitted. Short bars show where contact effort should go next.

Figure 9. Coverage by group.

6. Check **How questionnaires were completed**. If one administration mode dominates (more than 70% once at least 10 questionnaires are in), the chart shows an imbalance alert so the team can review the mix.

Figure 10. Administration modes.

- 7. Review **Time to complete the questionnaire** and **QA outcomes**. Very short or very long completions are what the QA duration rules flag.

Figure 11. Completion-time distribution.

Reports show counts and rates only — never names or answers — so they are safe to discuss with supervisors.

4.4 Downloading data

Figure 12. Data Export.

Download	Contains	Who
De-identified analysis export (CSV)	One row per questionnaire: sample_id, master_id, province, actor_family, value_chain, size_class, administration_mode, qa_status, submitted_at, completion_seconds. No names or contact details. Participants who withdrew are left out.	PI, Field Coordinator, Analyst
Full operational export (CSV)	Every questionnaire, including withdrawn ones (consent_withdrawn), plus organisation name, respondent name, phone, email and gatekeeper details. Internal operations only.	PI only
KoboToolbox data: Excel workbook	Every submission's answers for one form: data_codes (codes for SPSS/Stata/R), data_labels, a sheet per repeat group, the questions dictionary, the choices lists, and for the questionnaire the matched case, QA status, withdrawal flag and workflow status.	PI only
KoboToolbox data: All completed forms (PDF ZIP)	Every completed form as a PDF, with manifest.csv listing file, record, KoboToolbox id and submission time.	PI only

4.5 Working with the analysis export

- One row per questionnaire submission. sample_id links to the case; master_id to the organisation.
- qa_status: use only **QA_PASSED** rows for the main analysis unless the PI says otherwise.
- Participants who withdrew after submitting are already left out of this export (PI decision, 15 September 2026).
- completion_seconds is the time taken; administration_mode is 01–06 (see the table in the Quick reference).
- Store exports only on encrypted, access-controlled storage and delete working copies when no longer needed.

5. Rules you must follow

- Never try to re-identify organisations or people from exported data.
- Treat everything in the portal as **confidential research data**. Do not screenshot, copy, print or forward names, phone numbers, email addresses or answers except as your role requires.
- Never share your username or password, and never sign in for someone else.
- Use the respondent's contact details **only** to manage their participation in this study (invitations, reminders, appointments).
- Never tell a respondent, lender or anyone else that answers affect financing. The study generates **no score, rating or financing decision**.
- If a respondent asks to withdraw, stop contacting them and tell the Field Coordinator or PI the same day so the withdrawal is recorded.
- Report a lost device, a suspected account compromise, or data sent to the wrong person to the PI immediately.

6. Troubleshooting

Situation	Likely cause	What to do
Export button missing	Only the de-identified export is available to Analysts.	Ask the PI for any further extract.
"This screen isn't part of your role"	The screen belongs to another role (often an old bookmark or shared link).	Select Go to my start screen. If you need that screen, ask the PI about your role.
"Too many sign-in attempts from this network"	Sign-in is rate-limited per network; an office shares one address.	Wait a minute and try again. A wrong password says so explicitly.
A register shows fewer rows than expected	Registers show 20 rows per page to begin with; a Contact RA sees only assigned cases.	Choose more rows under Show at the foot of the list, use the page numbers or Next, or search. Ask the Field Coordinator to assign the case.
A button is greyed out	A required step is missing (a note, an authenticity decision, a selection).	Read the message beside the button; complete the missing step first.
"KoboToolbox couldn't be reached"	KoboToolbox is slow or the connection token has changed.	Try again in a few minutes. If it persists, tell the PI.
Form PDFs says "Not in sync with KoboToolbox yet"	The counts differ: a form was submitted or changed in KoboToolbox since the last sync (it runs every 15 minutes).	Select Sync now. If it still differs, or says it couldn't reach KoboToolbox, try again in a few minutes and tell the PI if it persists.
A document says "Already submitted" and its answers are locked	Its coding was already sent to KoboToolbox; changing it here would not change that record.	To redo the coding, delete that record in KoboToolbox, then select Sync now on Form PDFs. The document unlocks.
A page keeps loading	A slow or dropped connection.	Refresh the page. Your saved work is not lost; unsaved typing may be.
A file upload seems stuck	A large file on a slow connection takes time; the bar shows how much has been sent.	Wait for Saving... and the file name. If it fails, try again or upload a smaller version.

7. Quick reference

Sign in	https://research.agribizframework.com/admin/login
You start on	Executive Dashboard
