

How to complete and submit the questionnaire

About 15–25 minutes • Phone, tablet or computer • No app to install, no account to create

• Voluntary: you may stop at any time

Before you start

Your personal link

Sent to you by WhatsApp, SMS or email. It begins research.agribizframework.com/i/

For your organisation only

It works for 14 days. Please don't forward it; ask us for a new one if it has expired.

A steady connection

And 15–25 minutes without interruption. We will never ask for a password, bank details or payment.

Step by step

1 Open your link

Tap the link in your message. The study page opens in your browser.

2 Confirm your organisation

If the name shown is yours, tap **Yes, that's correct**.
Not your organisation? Stop here and contact us.

3 Tell us a little about you

Type **Your full name**, choose the answer to **Which best describes your role?**, then tap **Continue**.
If no role fits, choose **None of these describe me** and tell us who should answer.

4 Read the participant information

It explains the study, how your information is protected and your rights. Then tap **Continue to consent**.

5 Give your consent

Tap **I agree to take part**.
Prefer not to? Tap **I do not wish to take part**. That is completely fine.

6 Check what is already public (only if shown)

On **Before we continue**, mark each item **Yes, correct**, **Partly correct**, **No — correct it**, **Don't know**, **Prefer not to say** or **Not applicable**, then **Continue**. Or tap **Skip this step**.

7 Choose how to take part

Tap **Complete it myself now**, then **Start the questionnaire**.
Would like help? Choose **Have a researcher call me** or **Complete it via WhatsApp** instead.

8 Answer and submit

The questionnaire opens on KoboToolbox, the study's secure form service. Answer each question and tap **Next**. On the last page tap **Submit**, not **Save Draft**. The form jumps back to its first page, then a banner at the top says it **was successfully submitted**. You are done.

Make sure your answers arrive

- **Always start from your personal link**, never from a saved or forwarded questionnaire page. Only answers started from your link can be matched to your organisation.
- **Submit won't work?** Look for a question marked in red: it still needs an answer.
- **Your answers are sent only when you tap Submit**. The thank-you text on the last page appears before that, and **Save Draft** keeps your answers on your device only.
- **Submit once**. The empty form that appears after submitting is normal. Wait for the "successfully submitted" banner, don't fill the form in again, then close the page.
- **Questionnaire won't open?** Tap **Try again**, or **Ask a researcher to help me instead**. **Interrupted?** Open your link again; if you cannot carry on, contact us and a researcher will help.

Your answers are for research only. No score, rating or financing decision is produced, and your individual answers are never shared with any lender. Results are reported only in combined, anonymised form.
