

Role Guide 3: Contact Research Assistant

Step-by-step instructions for the Contact RA role in the ABF-FST Digital Respondent Portal.

STUDY	Developing and Validating the Agribusiness Bankability Framework for Food Systems Transformation through Novel Financing Models in Zimbabwe (ABF-FST)
PRINCIPAL RESEARCHER	Happyson Saina, Doctor of Strategic Management candidate, Chinhoyi University of Technology
SUPERVISORS	Dr L. Chikazhe and Dr J. Kanyepe
FOR	Research assistants who contact organisations and invite respondents
SYSTEM ADDRESS	https://research.agribizframework.com
CONTACT	0773943709 · abffst.research@gmail.com
VERSION	Version 1.11 · 28 September 2026

Screenshots in this document use **fictional demonstration data**. Organisation and person names, phone numbers and figures shown in them are not real study records.

1. Your role at a glance

You are the study's voice to the organisations assigned to you. You find the right senior person, record their contact details, send their personal invitation, log every attempt, send the approved reminders, and arrange calls for respondents who want help.

You can

- See the Main-400 Register — only the cases assigned to you — and open their case pages.
- Add and edit respondents and contact details.
- Send, resend and revoke invitations.
- Log contact attempts and change a case's status where allowed.
- Send follow-up reminders and manage appointments for your cases.

You cannot

- See cases assigned to other RAs, dashboards, QA, KII, documents, costs or exports.
- Assign cases, verify in bulk, activate Reserves or record a withdrawal (tell the Field Coordinator).
- See an invitation link again after leaving the page.

Where this fits

The System Manual explains how the whole system works. This guide covers only what you do, and its last section lists every screen and button you can use, with what each does and why. Ask the Field Coordinator or PI when something is outside your role.

2. Signing in and your screens

Signing in

1. Open <https://research.agribizframework.com/admin/login> in any modern browser (Chrome, Edge, Firefox or Safari), on a computer, tablet or phone.
2. Type your **Username** and **Password**, then select **Sign in**.

The screenshot shows a web browser window with a dark blue header bar. The header contains the text 'CHINGHOY UNIVERSITY OF TECHNOLOGY' and 'ABF-FST Research Operations Centre' in white. Below the header is a light gray background. In the center, there is a white box titled 'Internal sign in'. Inside this box, there are two input fields: 'Username' with the text 'pi.admin' and 'Password'. Below the password field is a dark blue button with the text 'Sign in' in white.

Figure 1. The sign-in screen for all internal staff.

3. You arrive on your start screen: **Main-400 Register**. The bar across the top lists only the screens your role (Contact RA) can open.

Accounts

There is no self-registration. The PI / System Admin creates every account and sets its role. Ask the PI if you need an account, a different role, or a password reset.

Finding your way around

- The **top bar** shows your username and role, and the screens you can use. It is not a full menu with some items greyed out: anything absent is simply not part of your role.
- Most screens have a **← Back to ...** link at the top that returns you to the screen you came from.
- Registers show **20 rows per page** to begin with. At the foot of the list, **Show** lets you choose 10, 20, 50, 100 or 200 rows per page (the portal remembers your choice), and the page numbers, **Previous**, **Next** and the double arrows take you to any page. The **Search** box above the list narrows it.
- **Change password** (top right) lets you set a new password at any time. Choose a long password you do not use anywhere else.
- **Sign out** (top right) ends your session. Always sign out on a shared or public computer.
- If you are inactive for a while you may be asked to sign in again. This protects research data on unattended devices.

Figure 2. Opening a screen outside your role (for example from an old bookmark) shows this card instead of the screen.

Your screens

Screen	What you use it for
Main-400 Register	Your assigned cases; select View to work on one.
Appointments	Calls and sessions respondents have requested.
Follow-ups	Reminders due today for your cases.

Changing your password

1. Select **Change password** in the top right corner.
2. Enter your **Current password**, then the **New password** twice, and select **Change password**.

 The screenshot shows the 'Change Password' screen. At the top, the user is logged in as 'piadmin - PI / System Admin'. The main navigation bar includes links for 'Executive', 'Sampling', 'Reports', 'Contact', 'QA Dashboard', 'KII/Doc Dashboard', 'Main-400 Register', 'Organisations', 'Appointments', 'Follow-ups', 'Form PDFs', 'QA Queue', 'QA Exceptions', and 'KII Register'. Below the navigation bar, there is a link to 'Back to Dashboard'. The 'Change Password' section contains three input fields: 'Current password', 'New password', and 'Confirm new password'. A 'Change password' button is located at the bottom of the form.

Figure 3. Change Password screen.

3. Use the new password next time you sign in. If you have forgotten your password, ask the PI to reset it.

3. Your routine

A suggested rhythm. Adjust it to the Field Coordinator's plan.

When	What to do
Start of day	Follow-ups: send every reminder due and mark each sent. Appointments: confirm today's.
Main work	Cases at S03: record the respondent and number, send invitations. Cases with no number: phone the organisation to identify the right person.
After every call or message	Log the contact attempt with outcome and a short note.
End of day	Anything unusual (refusal, withdrawal, wrong organisation) reported to the Field Coordinator.

4. Step-by-step tasks

4.1 Finding your cases

1. Select **Main-400 Register**. Only cases assigned to you are listed.

ABF-FST Research Operations Centre
contact.ra · Contact RA

Change password Sign out

Figure 4. Main-400 Register for a Contact RA.

2. Type a Sample ID, Master ID or organisation name in **Search**, or page through with **Next**.
3. Select **View** to open the case page.

4.2 Recording the respondent and their contact details

Invitations and reminders need a phone or WhatsApp number. Record the eligible person as soon as they are identified.

1. Open the case (**Main-400 Register → View**) and find **Respondents and contact details**.
2. Select **Add a person**. Enter **Full name**, **Phone**, **WhatsApp number**, **Email**, and a **Gatekeeper name** and **Gatekeeper contact** if you reach the person through a PA or receptionist.

Respondents and contact details

Full name Phone

WhatsApp number Email

Gatekeeper name Gatekeeper contact

Role Eligibility

Tendai Demo-Moyo
 CEO/MD - Eligible
 Phone +263 77 000 1000 · WhatsApp +263 77 000 1000 · respondent0@example.org

Figure 5. Adding a person to a case.

- Choose their **role** and the eligibility decision: **Eligible (I screened them)**, **Not eligible**, or **Not yet screened**.
- Select **Save person**. To correct details later, select **Edit** beside the person, change the fields, then **Save changes**.
- Write WhatsApp numbers in international form, e.g. **+263 77 123 4567**, so the WhatsApp buttons open the right chat.

Who is eligible?

Owner or founder, CEO or managing director, finance/credit/risk, operations, strategy/business development, supply chain/commercial, or another senior manager who can answer for the organisation. Anyone else should nominate the right person.

4.3 Sending an invitation

- Open the case. Check the status is **S03** and a respondent with a number is recorded.
- In **Invitations**, leave **Channel** as **WHATSAPP** (or choose EMAIL, SMS, PRINTED_CODE or QR to record how it was delivered) and **Wave** as **1**. Select **Send invitation**.

Invitations

Channel Wave

Wave	Channel	Status	Issued	Actions
1	WHATSAPP	SENT	9/15/2026	Revoke

Figure 6. Invitations panel before sending, with the history of earlier invitations.

- The personal link and 8-character manual code appear **once**, with the invitation already written for each channel. Choose **WhatsApp message**, **SMS message** or **Email message** to see exactly what will be sent: the personal link, its expiry date, the manual code and the study contact line.

Invitations

Invitation link (shown once -- send it now)

`http://localhost:3000/1/WPIS_gIH6Wn3HQArJwKBDrd0xedUMjtr-nUK2IRHk`

Manual code (for phone-assisted administration): 34BOJDLN - expires 9/30/2026

WhatsApp message SMS message Email message

Hello. You are invited to take part in the ABF-FST research study at Chinhoyi University of Technology on agribusiness financing in Zimbabwe. Taking part is voluntary.

Your personal link: `http://localhost:3000/1/WPIS_gIH6Wn3HQArJwKBDrd0xedUMjtr-nUK2IRHk`
(valid until 30 September 2026)

Prefer to answer by phone? Reply to this message and quote code 34BOJDLN.

Questions: Happyson Saina, 0773943709, abffst.research.cut@gmail.com

Send via WhatsApp **Copy message**

Opens the chat with Tendai Demo-Moyo (+263770001000). Send it from the study WhatsApp number.
After sending, log it under Contact timeline.

Figure 7. The link, manual code and ready-written messages are shown once, with a send button for each channel.

4. Send it on the channel that suits the respondent:
 - **Send via WhatsApp** opens that respondent's chat (their WhatsApp number, or phone number if none) with the message ready. Check you are on the study WhatsApp number, then press Send.
 - **Send by SMS** opens the phone's messages app addressed to the respondent, with the shorter SMS message. Use it on a phone.
 - **Email from study address** sends the email from abffst.research@gmail.com to the respondent's email on file; replies go to the study inbox. The email is recorded in the audit log.
 - **Open in email app** opens the same email in your own mail program, if you need to add something first.
 - **Copy message** copies the message shown, for any other channel.
5. If a button says no number or email is on file, add it under **Respondents and contact details**, then send a new invitation.
6. The case moves to **S05 Invitation sent** automatically. Log the attempt in **Contact timeline** (see Logging a contact attempt).

The link is shown only once

The portal stores only a scrambled fingerprint of the link, so nobody can display it again. If you close the page before sending, select **Send new invitation (replaces current)**: this issues a fresh link and the old one stops working immediately.

Links are valid for **14 days**. Each link belongs to one organisation; never forward one respondent's link to another organisation.

Revoking an invitation

In the invitation history, select **Revoke** on an open invitation (for example, if it was sent to the wrong number). The link stops working at once. Issue a new one if the case should still be invited.

4.4 Logging a contact attempt

Record **every** attempt, successful or not. The Contact Dashboard, Reports and any later replacement decision rely on it.

1. On the case page, scroll to **Contact timeline** → **Log a contact attempt**.

The figure shows a 'Contact timeline' section with the text 'No contact events recorded yet.' Below this is a 'Log a contact attempt' section. It contains two dropdown menus: 'PHONE' and 'REACHED'. Below these is a text input field labeled 'Notes (optional)'. At the bottom of this section is a blue button labeled 'Log contact attempt'.

Figure 8. Contact timeline and the form for logging an attempt.

2. Choose the **channel** (WHATSAPP, EMAIL, PHONE, SMS, FACE_TO_FACE) and the **outcome** (REACHED, NO_ANSWER, WRONG_NUMBER, REFUSED, RESCHEDULED, COMPLETED).
3. Add a short, factual note (optional), e.g. "PA says MD travelling; call back Thursday". Do not record opinions about the person.
4. Select **Log contact attempt**. The entry appears at the top of the timeline with the date and time.

4.5 Sending follow-up reminders

Approved reminders fall due on **Day 2** and **Day 7** after an invitation for respondents who have not yet submitted. Until automatic WhatsApp sending is connected, a person sends each one.

1. Select **Follow-ups**. Each card shows the case, organisation, which reminder is due, when the invitation went out, the respondent and their number, and the exact approved message.

The figure shows a screenshot of the 'Follow-ups' section in the ABF-FST Research Operations Centre. The header includes 'ABF-FST Research Operations Centre', 'contact.ra · Contact RA', and links for 'Change password' and 'Sign out'. Below the header is a navigation bar with 'Main-400 Register', 'Appointments', and 'Follow-ups'. A link '← Back to Main-400 Register' is visible. The 'Follow-ups due' section has a sub-header 'Approved reminders for invited cases that haven't responded yet. Open WhatsApp, send the message, then mark it sent.' There are three cards, each representing a case. Each card shows a case ID (e.g., SID-2026-000039), the organisation name (e.g., Silver Stream Livestock Traders), the reminder type and date (e.g., Day 7 final routine attempt - invited 9/7/2026), and a note 'no number on file'. Each card contains a text box with the reminder message: 'Hello, this is a final reminder about the ABF-FST research study invitation. If you would still like to take part, please use the link you were sent. Thank you.' Below the text box are two buttons: 'Open WhatsApp (choose contact)' and 'Mark as sent'.

Figure 9. Follow-ups due. Contact RAs see only their own cases.

2. Select **Open in WhatsApp**. WhatsApp opens with the message ready for that number; send it. If the card says **no number on file**, the button reads **Open WhatsApp (choose contact)** — pick the chat yourself, and add the number to the case afterwards.
3. Come back and select **Mark as sent**. The card disappears and the reminder is recorded under your name.

Mark as sent only after sending

A case can become **S13 Nonresponse** (and be replaced by its Reserve) only after every reminder has been recorded as sent. Marking a reminder you did not send could lead to an organisation being replaced without being contacted.

4.6 Managing appointments

1. Select **Appointments**. Each row shows the case (Sample ID and organisation) or KII, the requested time, the mode (PHONE, WHATSAPP_VOICE, ZOOM, ...) and the status.

Case / informant	Scheduled for	Mode	Status	Actions
SID-2026-000045 Highveld Meadow Agro-Dealers	9/13/2026, 7:15:00 PM	PHONE	COMPLETED	No further action
SID-2026-000051 Baobab Ridge Poultry Farmers Association	9/14/2026, 7:15:00 PM	FACE_TO_FACE	MISSED	No further action
SID-2026-000025 Granite Kopje Agro-Dealers	9/16/2026, 9:15:00 PM	PHONE	REQUESTED	CONFIRMED CANCELLED
SID-2026-000029 Red Earth Dairy Processors	9/18/2026, 12:15:00 AM	WHATSAPP_VOICE	CONFIRMED	COMPLETED MISSED CANCELLED
SID-2026-000087 Silver Stream Fresh Produce Market	9/18/2026, 10:00:00 AM	PHONE	REQUESTED	CONFIRMED CANCELLED
SID-2026-000041 Acacia Downs Growers Cooperative	9/18/2026, 7:15:00 PM	ZOOM	REQUESTED	CONFIRMED CANCELLED

Figure 10. Appointment Queue.

2. Use **Filter by status** to show, for example, only **REQUESTED** appointments.
3. Contact the respondent to confirm, then select **CONFIRMED**.
4. After the session select **COMPLETED**, or **MISSED** if they did not attend, or **CANCELLED**. Only valid next steps are shown; a finished appointment shows **No further action**.

4.7 Phone, WhatsApp-call or face-to-face administration

When the respondent prefers help, the researcher completes the questionnaire with them. The respondent must still hear the participant information and agree before any question is asked.

1. Agree a time. If the respondent booked through the portal, it is in **Appointments**.
2. At the start of the call, confirm the organisation and the person's role, read or summarise the Participant Information Sheet (v1.3) and ask for consent. Stop if they decline.
3. Open the respondent's personal invitation link on your device and go through the portal screens with them (organisation, role, information, consent), choosing the answers they give you.
4. Open the questionnaire from the portal so the case identifiers travel with the form, and complete it with the respondent. Never start the KoboToolbox form from a bookmark: a submission without the portal's link is set aside and not matched.
5. After submitting, log the contact attempt with outcome **COMPLETED**, and mark the appointment **COMPLETED**.

Code	Mode	What happens
01	Web self-administration	The respondent completes the questionnaire alone from the link.
02	WhatsApp link, self-completion	The link is sent by WhatsApp; the respondent completes it alone.
03	Telephone, interviewer-administered	A researcher calls and completes the form while the respondent answers.
04	WhatsApp call, interviewer-assisted	As 03, over a WhatsApp voice or video call.
05	Video call, interviewer-assisted	As 03, over Teams, Zoom or Google Meet.
06	Face to face	In person; the researcher operates the device.

4.8 Verifying a profile with the respondent, and reconciling it afterwards

Once a profile is locked, the interview has two duties: confirm what is public, and ask what is not. The **Interview sheet** is where you do both, and where the results are reconciled afterwards. It appears on the locked profile on the case page (coordinator and PI), on the case page of an assisted interview (Contact RA) and on the KII record (KII RA). Nothing here changes the public value.

1. Open the case (or the KII record) and find **Interview sheet: confirm what is public, ask what is not**. Each row is one fact and is marked **Confirm**, **Confirm**, then **probe** or **Ask**.

Interview sheet: confirm what is public, ask what is not Verified 4 of 5 - settled 3 of 5

Read each public fact to the respondent and record what they say. Never state a fact shown as "Ask". It is a question, not something established. Their answer is kept separately and never replaces the public value.

Registered/legal organisation name Confirm Settled

Public source says: Ironwood Vale Dairy Processors (Private) Limited
[Company registry extract](#) - example.org

What the respondent said
 Confirmed: it is correct Comment (optional) Save answer

Recorded: Confirmed: it is correct

Year established Confirm Settled

Public source says: 2011
[Company registry extract](#) - example.org

What the respondent said
 Confirmed: it is correct Comment (optional) Save answer

Recorded: Confirmed: it is correct

HQ district Confirm Differs from the public source

Public source says: Harare
[Contact us page](#) - example.org

What the respondent said
 Partly correct or out of date Head office in Harare; main depot in Marondera Moved the depot last year Save answer

Recorded: Partly correct or out of date — "Head office in Harare; main depot in Marondera"

Reconciled value (required)
 The value you code for analysis Save reconciled value

Key products/services Confirm

Public source says: Seed, fertiliser and crop-protection inputs
[Products page](#) - example.org

What the respondent said
 Choose... Comment (optional) Save answer

Publicly disclosed lenders/finance facilities Ask Settled

Not found publicly. Ask this in full.

What the respondent said
 They told us A working-capital line with a commercial bank, renewed each se Comment (optional) Save answer

Recorded: They told us — "A working-capital line with a commercial bank, renewed each season"

Reconciled value
 Working-capital facility with a commercial bank (respondent-reported) Save reconciled value

Interview finished 9/21/2026, 9:41:36 PM Record a protocol deviation

The case cannot be passed by QA (questionnaire) or have its coding completed (RUI) until every fact here is verified with the respondent and, where they corrected or qualified it, reconciled.

Figure 11. The interview sheet: confirm what is public, ask what is not.

- For a **Confirm** row, read the public fact to the respondent, with its source shown under it, and ask whether it is right. Never state a fact on an **Ask** row: it is a question, not something established. A weak source's value is deliberately hidden.
- In **What the respondent said**, choose the answer: confirmed, corrected, partly correct or out of date, does not know, prefers not to say, or does not apply. For a correction, type **Their answer**. Add a comment if useful, then select **Save answer**.
- For an **Ask** row, choose **They told us** and type what they said, or record that they do not know or would rather not say.
- When the interview is over, select **Interview finished**.

After the interview: reconcile (coordinator and PI)

- Rows where the respondent corrected or qualified a fact show **Differs from the public source**. Under **Reconciled value (required)**, type the value you code for analysis, then select **Save reconciled value**. A plain confirmation or "does not apply" needs no reconciled value.

The screenshot shows a web form for reconciling a fact. At the top, it says 'HQ district' and 'Public source says: Harare'. There is a 'Confirm' button and a red warning box that says 'Differs from the public source'. Below this, it says 'Contact us page - example.org'. The main section is titled 'What the respondent said' and contains three input fields: a dropdown menu with 'Partly correct or out of date', a text box with 'Head office in Harare; main depot in Marondera', and another text box with 'Moved the depot last year'. There is a 'Save answer' button. Below the input fields, it says 'Recorded: Partly correct or out of date — "Head office in Harare; main depot in Marondera"'. At the bottom, there is a section for 'Reconciled value (required)' with a text box containing 'The value you code for analysis' and a 'Save reconciled value' button.

Figure 12. Reconciling a corrected fact: the three values stay separate.

- The status at the top of the sheet counts up: “Verified 6 of 8 · settled 5 of 8”, then **Reconciled** when every fact is settled. At that moment the portal also sends the whole profile (what was known, what the respondent said, the reconciled value, and the sources) to KoboToolbox, in the **ABF-FST PROIT Interview Profile** form, and the status shows **Saved to KoboToolbox**.
- If reconciliation truly cannot be finished (for example the respondent cannot be reached again), select **Record a protocol deviation** and give the reason. The case is released but stays flagged.

A case is not complete until its profile is reconciled

QA cannot **Accept** a questionnaire, and a KII's coding cannot become COMPLETE, while a locked profile still has facts not verified with the respondent or not reconciled. The message says how many are outstanding. Re-query and Reject are never blocked.

This applies only to a case that has a locked profile with facts on it. A case with no profile is not held up.

4.9 When the person is not the right respondent

- If someone chooses **None of these describe me**, the portal thanks them and the questionnaire never opens. No answers are recorded.
- Ask them politely to nominate the right senior person, record that person under **Respondents and contact details**, and send a new invitation.
- If nobody suitable exists, record the reason in the contact timeline and move the case to **S14 Ineligible** (Field Coordinator or PI).

4.10 When someone refuses or asks to withdraw

- Thank them politely and do not try to persuade them.
- Log the contact attempt with outcome **REFUSED** and their words in the note.
- Tell the Field Coordinator the same day. They record the withdrawal or refusal and decide on the Reserve.
- Do not contact the person again.

4.11 What to say to a respondent

- Who you are: a research assistant on the ABF-FST study at Chinhoyi University of Technology, led by Happyson Saina.
- Why them: their organisation was selected to take part in a doctoral study on agribusiness financing readiness.

- What it involves: a questionnaire of about 15–25 minutes, online or with a researcher by phone or WhatsApp.
- It is voluntary and confidential; no score, rating or financing decision is produced, and answers are never shared with lenders.
- Questions: Happyson Saina, 0773943709, abffst.research@gmail.com.

5. Rules you must follow

- Contact only the cases assigned to you.
- Never send one organisation's link to another, and never post links in groups.
- Mark a reminder as sent only after you have sent it.
- Treat everything in the portal as **confidential research data**. Do not screenshot, copy, print or forward names, phone numbers, email addresses or answers except as your role requires.
- Never share your username or password, and never sign in for someone else.
- Use the respondent's contact details **only** to manage their participation in this study (invitations, reminders, appointments).
- Never tell a respondent, lender or anyone else that answers affect financing. The study generates **no score, rating or financing decision**.
- If a respondent asks to withdraw, stop contacting them and tell the Field Coordinator or PI the same day so the withdrawal is recorded.
- Report a lost device, a suspected account compromise, or data sent to the wrong person to the PI immediately.

6. Troubleshooting

Situation	Likely cause	What to do
The case is not in my register	It is assigned to someone else or unassigned.	Ask the Field Coordinator to assign it.
No Send invitation button	Your role is read-only here, or the case is a locked Reserve.	Check with the Field Coordinator.
WhatsApp opens the wrong chat	The number is missing the country code.	Edit the person: +263 followed by the number without the first 0.
I closed the page before copying the link	Links are shown once.	Select Send new invitation (replaces current).
"This screen isn't part of your role"	The screen belongs to another role (often an old bookmark or shared link).	Select Go to my start screen. If you need that screen, ask the PI about your role.
"Too many sign-in attempts from this network"	Sign-in is rate-limited per network; an office shares one address.	Wait a minute and try again. A wrong password says so explicitly.
A register shows fewer rows than expected	Registers show 20 rows per page to begin with; a Contact RA sees only assigned cases.	Choose more rows under Show at the foot of the list, use the page numbers or Next, or search. Ask the Field Coordinator to assign the case.
A button is greyed out	A required step is missing (a note, an authenticity decision, a selection).	Read the message beside the button; complete the missing step first.
"KoboToolbox couldn't be reached"	KoboToolbox is slow or the connection token has changed.	Try again in a few minutes. If it persists, tell the PI.
Form PDFs says "Not in sync with KoboToolbox yet"	The counts differ: a form was submitted or changed in KoboToolbox since the last sync (it runs every 15 minutes).	Select Sync now. If it still differs, or says it couldn't reach KoboToolbox, try again in a few minutes and tell the PI if it persists.
A document says "Already submitted" and its answers are locked	Its coding was already sent to KoboToolbox; changing it here would not change that record.	To redo the coding, delete that record in KoboToolbox, then select Sync now on Form PDFs. The document unlocks.
A page keeps loading	A slow or dropped connection.	Refresh the page. Your saved work is not lost; unsaved typing may be.
A file upload seems stuck	A large file on a slow connection takes time; the bar shows how much has been sent.	Wait for Saving... and the file name. If it fails, try again or upload a smaller version.

7. Quick reference

Sign in	https://research.agribizframework.com/admin/login
You start on	Main-400 Register
Invitation valid	14 days
Reminders	Day 2 and Day 7, from Follow-ups
Outcome codes	REACHED, NO_ANSWER, WRONG_NUMBER, REFUSED, RESCHEDULED, COMPLETED
Help	Field Coordinator; PI: Happyson Saina, 0773943709, abffst.research@gmail.com

8. Every screen and button for your role

This section lists every screen you can open as Contact RA, and for each control: what it does and when to use it, why it exists (the rule behind it), and what you will see next. It is the same material as the Screen and Button Reference, cut down to your role.

Reading the tables

Control is the label you see on screen. **Why it exists** explains the rule or risk behind it; if a button is greyed out, this column usually says why. A control that needs a note or a confirmation says so.

8.1 Sign in

Who can open it: every role. **Where:** /admin/login

Where every staff member starts. Staff accounts are created by the PI; there is no self-registration.

Control	What it does and when to use it	Why it exists	What happens next
Username	Type the username the PI gave you.	Every action in the portal is recorded against a named person, so accounts are never shared.	Nothing yet; you also need the password.
Password	Type your password. The characters are hidden.	Passwords are never shown or emailed; the PI can reset yours but cannot read it.	Nothing yet; select Sign in.
Sign in	Checks your username and password and opens your start screen (the first screen your role uses).	Repeated wrong attempts from one network are refused for a minute, to stop password guessing.	Your start screen opens. A wrong password says so. "Too many sign-in attempts" means wait a minute.

8.2 The header and menu bar (every screen)

Who can open it: every role. **Where:** (top of every screen)

Shown at the top of every signed-in screen. The menu bar lists only the screens your role may open.

Control	What it does and when to use it	Why it exists	What happens next
Menu bar (Executive, Sampling, ... Audit)	Opens a screen. The current screen is underlined.	The list is built by the server from your role, so you never see a screen that would refuse you.	The screen opens. A screen not in your list shows "This screen isn't part of your role".
Change password	Opens the Change Password screen.	You should change the first password you were given, and any password you think someone saw.	The Change Password screen opens.
Sign out	Ends your session on this device.	Protects the data if the device is shared or lost. Always sign out on a shared device.	Your session on this device ends and you return to the Sign in screen.

Control	What it does and when to use it	Why it exists	What happens next
← Back to ... (top left)	Returns to the parent screen (for example from a case to the register).	A consistent way back that does not lose your place in the menu.	The parent screen opens.
Go to my start screen	Appears on the “This screen isn't part of your role” page and takes you to your own start screen.	An old bookmark or shared link may point at a screen that belongs to another role; this gets you out safely.	Your start screen opens.

8.3 Change Password

Who can open it: every role. **Where:** /admin/account

Change your own password.

Control	What it does and when to use it	Why it exists	What happens next
Current password	Type the password you use now.	Proves it is really you before a change, in case a signed-in device was left open.	Nothing yet.
New password	Type the new password.	It must be long enough, not a common password, not all digits and not similar to your username or name; the screen says which rule failed.	Nothing yet.
Confirm new password	Type the new password again.	Catches a typing slip that would lock you out.	Nothing yet.
Change password	Saves the new password.	Your old password stops working straight away, and other people (including the PI) never see your new one.	A confirmation appears. Use the new password next time.

8.4 Main-400 Register (and Reserve)

Who can open it: PI / System Admin, Field / Digital Coordinator, Contact RA, Supervisor. **Where:** /admin/sample

The list of sample cases. A Contact RA sees only the cases assigned to them. From here you open a case, and the coordinator moves or reassigns cases in bulk.

Control	What it does and when to use it	Why it exists	What happens next
Main / Reserve (sample type)	Switches the list between the 400 Main cases and the 400 locked Reserve cases.	Reserve cases are locked replacements and are handled differently from Main cases.	The list changes and returns to page 1.
Search ID or organisation	Filters the list as you type.	Finding one case among hundreds should not need paging.	Only matching cases are listed.

Control	What it does and when to use it	Why it exists	What happens next
View	Opens the case page for that row.	All work on a case happens on its own page.	The case page opens.
Show / page numbers / Previous / Next	Chooses how many rows to see (10, 20, 50, 100 or 200) and moves between pages.	Different jobs need different views; your choice is remembered.	The list redraws at the chosen size.

8.5 Case page

Who can open it: PI / System Admin, Field / Digital Coordinator, Contact RA, Supervisor. **Where:** /admin/sample/{Sample ID}

Everything about one organisation's place in the sample: who to contact, the invitation, the questionnaire, the timeline and the case's status.

Control	What it does and when to use it	Why it exists	What happens next
Advance workflow status (→ S0x buttons)	Moves the case to the next valid status, for example from Eligible respondent identified to Invitation prepared.	The workflow is a fixed sequence (S00–S16): a case cannot skip steps, and each move is recorded. Only statuses that are allowed next are shown.	The status changes and the change is added to the audit log. “No further transitions” appears at a final status.
Respondents and contact details → Add a person	Records a person at the organisation: name, role, phone, WhatsApp, email, gatekeeper, and whether they are eligible.	Invitations, reminders and phone-assisted interviews all need to know who to contact and whether they are the right (senior, knowledgeable) person.	A form opens. After Save, the person is listed on the case.
Respondents panel → Edit / Save / Cancel	Corrects a person's details. Save keeps the change; Cancel discards it.	Contact details go stale, and a wrong number wastes a whole reminder sequence.	The person's details update; Cancel leaves them unchanged.
Eligibility (Not yet screened / Eligible / Not eligible)	Records the outcome of your eligibility screening of that person.	Someone not eligible must never receive the questionnaire: the system will not hand out the questionnaire link without a passed eligibility check and the person's consent.	Eligible lets the questionnaire link work once consent is given. Not eligible sends the respondent to a referral instead.
Invitations → Issue invitation (Channel, Wave)	Creates a personal invitation link (valid 14 days) and an 8-character manual code, for the chosen channel and wave.	Respondents are invited by a private, expiring link. The link is shown once and only a scrambled form is stored, so a stolen database cannot reveal live links. A new invitation replaces the old one.	The link and code appear once, ready to send. If the case cannot be invited (for example a locked Reserve case) you are told why.
Send via WhatsApp / Send by SMS / Open in email app	Opens WhatsApp, your SMS app or your email program with the invitation message already written.	The portal does not send messages itself: you send from the study's own account so replies come to you.	Your messaging app opens with the text. Send it, then log it on the Contact timeline.

Control	What it does and when to use it	Why it exists	What happens next
Send email (from the portal) / Copy message	Sends the invitation email from the portal (if email is set up), or copies the text so you can paste it anywhere.	Some respondents prefer email; copying is the fallback for any other channel.	"Sent to ..." or "Copied".
Revoke	Cancels an invitation so its link stops working.	Use if it went to the wrong person or the wrong address; it is also how a wrong send is undone.	The link stops working at once and the invitation is shown as revoked.
Log a contact attempt (Channel, Outcome, Notes, Log contact attempt)	Adds an entry to the Contact timeline: how you tried, what happened (Reached, No answer, Wrong number, Refused, Rescheduled, Completed) and a note.	The timeline is the study's record of effort. It shows why a case is nonresponsive and protects respondents from being contacted twice by mistake.	The entry appears at the top of the timeline with your name and the time.
Record a withdrawal (Reason, How they told us, Record withdrawal)	Records that the participant wants to withdraw. You give the reason and whether they told you by phone or in person, or in writing.	A participant's right to withdraw must take effect at once and completely: their consent is recorded as withdrawn, every open invitation is revoked, reminders stop, and their phone, WhatsApp, email and gatekeeper contact are erased.	A confirmation warns that it cannot be undone. The case moves to Refused (a case already submitted keeps its status). Any answers already submitted are kept but left out of the analysis export and flagged.
Completed questionnaire → Download PDF	Downloads the participant's completed questionnaire as a readable PDF.	A readable copy is needed for QA notes and for the participant if they ask.	A PDF downloads. The download is recorded in the audit log.

8.6 Interview sheet (verifying a locked profile)

Who can open it: PI / System Admin, Field / Digital Coordinator, Contact RA, KII RA, Supervisor. **Where:** (on the case page, and on the KII record)

The locked pre-interview profile as the interviewer uses it: confirm what is public, ask what is not, record what the respondent says, and after the interview reconcile it. The coordinator and PI see it inside the PROIT panel; a Contact RA sees it on a case assigned to them; a KII RA on a KII record.

Control	What it does and when to use it	Why it exists	What happens next
Status (Verified x of y · settled x of y / Reconciled)	Counts how many facts have been verified with the respondent and how many are settled. It reads Reconciled when all are.	A case is not complete until every fact is verified and, where corrected, reconciled.	Read only. It updates as answers are saved.
Confirm / Confirm, then probe / Ask (label on each row)	Tells you what to do with that row: confirm a public fact, confirm it and probe (sources disagree), or ask the question in full because nothing reliable is public.	Asking only what is not public reduces the burden on the respondent.	Read only.

Control	What it does and when to use it	Why it exists	What happens next
Public source says (with source links)	Shows the public fact and where it came from. A weak source's value is hidden and the row says to ask in full.	A weak or uncorroborated fact must never be put to a respondent as if it were established.	Read only. Select a source to open it.
What the respondent said	Record the answer: confirmed, corrected, partly correct or out of date, does not know, prefers not to say, or does not apply. For a gap, "They told us".	The respondent's answer is kept separately from the public value and never replaces it; that separation is what lets the analysis compare the two.	Nothing is saved until Save answer.
Their answer / Comment	Type what the respondent said when they corrected or supplied a value, and any comment.	The exact answer is the research data; the comment explains it.	Kept with the row.
Save answer	Saves the answer for that fact.	Each answer is recorded as it is given, so nothing depends on memory after the interview.	The status updates; "Recorded: ..." appears under the row. A correction shows "Differs from the public source".
Differs from the public source (label)	Marks a fact the respondent corrected or qualified.	Contradictions between public sources and respondents are findings, not errors to hide.	Read only. The coordinator reconciles it.
Interview finished	Records that the interview and its verification are over, so reconciliation can begin.	Separates what was said in the interview from the researcher's later coding.	It shows the time it was recorded.

8.7 Appointment Queue

Who can open it: PI / System Admin, Field / Digital Coordinator, Contact RA, Supervisor. **Where:** /admin/appointments

Calls that respondents have asked for, and their progress.

Control	What it does and when to use it	Why it exists	What happens next
Filter by status	Shows all appointments, or only Requested, Confirmed, Completed, Missed or Cancelled.	Coordinators mostly need the ones still to be acted on.	The list changes and returns to page 1.
CONFIRMED / CANCELLED (on a Requested appointment)	Confirm the time with the respondent and select CONFIRMED, or CANCELLED if it will not happen.	A respondent's request is only a request until a person confirms it.	The appointment's status changes.
COMPLETED / MISSED / CANCELLED (on a Confirmed appointment)	Record what happened at the appointment time.	Missed calls need to be rescheduled and counted; completed ones move the case forward.	The status changes; finished appointments show no more buttons.
Show / page numbers	Choose rows per page and move between pages.	As on every register.	The list redraws.

8.8 Follow-ups due

Who can open it: PI / System Admin, Field / Digital Coordinator, Contact RA, Supervisor. **Where:** /admin/follow-ups

Approved reminders (on days 0, 2, 4–5 and 7 after an invitation) for invited cases that have not responded.

Control	What it does and when to use it	Why it exists	What happens next
Case link (Sample ID)	Opens the case the reminder is for.	Lets you check the case before you send.	The case page opens.
Open in WhatsApp	Opens WhatsApp with the reminder text already written for that respondent.	Reminders are sent by a person from the study's WhatsApp account: nothing is sent automatically, so a person always decides.	WhatsApp opens with the message. If the button says “Open WhatsApp (choose contact)”, there is no number on file: pick the contact in WhatsApp, and add the number on the case afterwards.
Mark as sent	Tells the portal you sent the reminder.	Otherwise the same reminder stays due and could be sent twice.	It is recorded as sent by you and leaves the list.
